Protective Services Professional Certification (PSPC)

Protective Services Professional Certification (PSPC) teaches contemporary methods for low visibility personal security in permissive to semi-permissive environments, where a low to moderate threat exists. This highly academic and practical application-based training creates a comprehensive and balanced foundation for prospective or current members of protective details. Subject matter comprises the most progressive and relevant doctrine currently available for those seeking instruction in modern EP practices. Students will receive instruction from active industry professionals providing protective services to business leaders, high net-worth individuals and public figures.

The curriculum is a blended learning format of face-to-face classroom instruction, field exercises, case studies, subject matter expert speakers, and practical scenarios. The seven (7) day course includes the essential elements of personal security services and protective vehicle operations with hands-on performance driving track time.

Topics included in the seven (7) day training are:

- Fundamentals of Protective Security
- PSD Organization & Operations
- Agent Conduct & Responsibilities
- Legal Issues & Use of Force
- Protocol & Etiquette for Personal Security
- Agent Equipment & Attire
- Walking Formations
