

Casula Veterinary Hospital and Elizabeth Drive Animal Hospital

Boarding your cat with us means:

- Each cat has his own vertical run with several levels to jump, climb and hide on.
- Each run has a "hideaway hood" w/ blanket and heating pad on chilly nights
- Each run has a view of its own!
- Cats are fed dry Hills Science Diet, which is available for sale at either of our hospitals!
- Because you are boarding at a vet hospital you can be sure your cat can receive medical or emergency treatment if necessary.
- Fully qualified nursing staff available to medicate and/or treat your cat if needed.
- Staff members on-site 24 hours!

B O O K I N N O W !

Boarding your cat with us means:

Your cat will receive the same care, by the same qualified staff, that they receive at any consultation or hospital visit. Whether you're boarding overnight or long-term, your cat will receive the best care possible. Should your cat require medical or emergency treatment while you are away, you can rest comfortably knowing that qualified veterinary staff are always nearby! We have staff on-premises 24 hours!

Vaccinations Required

Because your pet is boarding at a veterinary hospital, they must be up-to-date with their vaccinations. This means they must have had one every year, and within the past year. Proof of vaccination will be required on admission. We want your pet's time with us to be as comfortable and as safe as possible. For this reason we will not board unvaccinated cats in the same cattery. We can even vaccinate your cat while they are boarding with us!

If your cat is not vaccinated but you need to board in a hurry, we can keep your pet in our hospital and vaccinate while they are with us. Please speak with our nursing staff for information about boarding in-hospital.

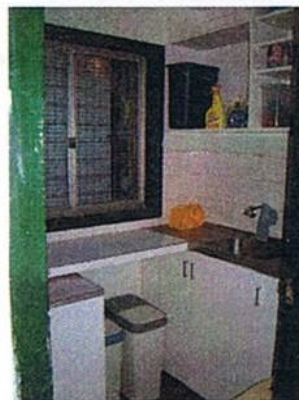

We Cater to Your Cat

Our cattery is located in a separate building from our hospitalized animals. This means your cat is kept well away from the barking dogs that also visit our hospital! Each "run" goes from floor to ceiling with several levels for your pet to climb, play and hide on.

Each run contains an elevated sleeping "hideaway" for privacy and there is no contact with other cats in adjoining runs. During our busiest holidays each run can be halved vertically and still contain several levels for your pets' amusement. Each run is designed to accommodate a single cat, but are

large enough for two family cats if necessary.

Individual diets are catered to and prepared in our cattery

kitchen area. Cats are fed Hills Science Diet which is available for sale in both of our hospitals. We also cater to specialized medical diets. Is your pet on medications? Because our nursing staff is looking after your pet, you can be sure your cat is receiving the appropriate medical care he or she requires!
