

# Summer school available for grades K-5!

## One Month Session!

• Summer program will run May 28 through June 28

## Easy registration!

- Call Ms. Jessica Yeager at 866-501-9473 ext. 2007
- If no answer, leave the student's name and phone number

## **Free for all VCS students!**

Virtual Community  
School of Ohio

## **How it works:**

VCS will offer our students in grades K-5 an opportunity to take summer school. Students can use the summer months to catch up or work ahead. Registration is FREE and students will be enrolled in both Summer Math and Summer Reading. This summer session will run from May 28 through June 28.

## **What we offer:**

### Summer Math

K-5 summer math is an opportunity to improve your math skills with a great, interactive, self-paced program. We will be utilizing the DreamBox Learning Math program. DreamBox does a great job of "gamifying" math, making it fun! The program will meet the students where they are and build on what they know. The program will move students along at a pace that is doable for them with lessons that adjust to the way each student learns.

### Summer Reading

Do you enjoy reading? Would you like to have full online access to a large collection of e-books you can read and listen to right on your computer? Join us for K-5 summer reading where you will have an opportunity to read books you choose while improving your reading skills. Students will have access to myOn Reader and Bug Universe--two comprehensive libraries. Students will be encouraged to read and respond to chosen books on topics of personal interest. This is a great opportunity to continue reading all summer!
