

Be Your Dog's Hero

Do a check once a month to Chase Away K9 Cancer

-  **Take 10 minutes on the 14th** of each month to feel and look for lumps, bumps, and swellings
-  **Check your dog from head to toe**, including the inside of their mouth
-  **Follow up with an exam** by your vet if you find anything suspicious or worrisome
-  **Keep a record of any growths** so you can keep track of anything new
-  **Watch for any unusual behavior** or change in attitude

1 in 3 dogs will develop cancer.

Remember "10 on the 14th" and you could make a difference in treatment and prognosis!
