## Deep Space Terraformers: Robotics!

with Karen Manning

**Students entering grades 7-9**

**July 29-August 2**

**Time: 9AM - 2PM**

**Cost \$200 / Session**

***(Please bring a peanut-free  
lunch and a drink.)***

Using Lego Terraformer Robots, students will work in teams, learn to program the robots, and use them to solve problems encountered in simulated space missions! This Terraformers experience involves students in an engaging "hands-on, minds-on" environment where guided navigation leads students forward along this imaginative mission into space.

## A Quest for Quicker Communication!

with Amy Majka

**Students entering grades 3 -4**

**July 22-26 OR August 5-9**

**Mornings 8:30-11:30AM**

**Cost \$100 / Session**

Program will give students an understanding of sound waves and basic communication systems through hands-on activities. The week will include Morse code practice, sending and receiving messages using Marconi's telegraph systems!

## Elements of Summer!

with Annie Haven

**Students entering grades 5-7**

**July 22-26**

**Afternoons 12:30 - 3:30PM**

**Cost \$100 / Session**

A chemistry workshop based on labs related to the periodic table of the elements! Students will participate in such activities as decomposing water, building compounds, and using glow sticks to learn about chemical reaction rates.

## Sounds Like Summer!

with Annie Haven

**Students entering grades 5-7**

**August 5-9**

**Afternoons 12:30-3:30PM**

**Cost \$100 / Session**

Learn about the physics of sound waves and communication systems! Students will participate in a variety of hands-on experiments including the creation of string telephones and exploration of how sound travels.
