

LEAGUES, CLUBS AND TEAMS

TEAM ADMINISTRATORS AND COACHES:

- Flexibility to have Athletes take the test in a computer lab, office, or at their home.
- Monitor Athletes' results and see for yourself which Athletes have acceptable Baseline tests.
- Ability to purchase test credits and send vouchers.
- Group Athletes by team or level.
- Share results with others vested in an Athlete's care.

QUICK – The Athlete account is easily created and secure. A Baseline test will take about eight to 10 minutes.

EASY TO UNDERSTAND – Features playing cards which are universally understood at every age and educational level with no language barriers. *Please note: The Axon Sports CCAT is currently available to Athletes age 10 and older.*

CAN BE USED FREQUENTLY WITH CONFIDENCE – Whether it's used daily or hourly, repeated testing will not generate a practice effect.

CONVENIENT – No software to download. The test and resulting data are available online and protected using a secure password system.

SCIENTIFICALLY VALID – The Axon Sports CCAT is powered by CogState technology which has been validated in peer-reviewed articles.

WELCOMING – We provide a Resource Center for Parents and Athletes. You can also watch videos or download helpful documents.

CUSTOMER SERVICE – Live support is available via phone or live chat. You may also email your questions to customerservice@axonsports.com

WHY AXON SPORTS?

- Axon Sports leads the way as an innovator in online concussion management tools that address the growing need for Baseline and After Injury testing. Its mission is to protect and train the Athletic brain and believes Every Athlete should have access to a Baseline Test Every Year.
- The Axon Sports online cognitive test:
 - Can be taken on any computer (PC or MAC) with a modern web browser.
 - Is scientifically valid and reliable
 - Fosters a game-like attitude and competitive nature which encourages a "best effort" Baseline.
- An Athlete's test history stays with them through their athletic career.
- Having a Baseline test enables a qualified Medical Provider to compare an Athlete's individual After Injury results to his or her individual Baseline results. This eliminates the chance that a comparison to general population norms leads to incorrect interpretation and treatment.

COGNITIVE TESTING IN CONCUSSION MANAGEMENT PROGRAMS

- The latest concussion management programs feature several tools to ensure Athlete health and safety. Cognitive testing is a best practice at all levels of play. Axon Sports meets this standard by providing Athletes a quick and cost-effective online test.
- When an Athlete takes a cognitive Baseline test, he or she establishes a "snapshot" of their brain's speed and accuracy.
- Repeating this test after an injury helps identify any cognitive changes from the Athlete's Baseline performance, which assists qualified Medical Providers in determining if the brain has fully recovered.
- Qualified Medical Providers use the Axon Sports online After Injury test results when making decisions about when it is safe for Athletes to return to play.

RECEIVE A 10% DISCOUNT
