

**SAVE THE DATE – July 1, 2011 College and Career Academy Grant Workshop
9:00 a.m. – TCSG 3rd Floor Conference Room**

Cagle Announces 10 Million in College and Career Academy Grants

Lieutenant Governor Cagle is proud to announce that the Technical College System of Georgia will for the fifth year begin to solicit grant applications for \$10 million dollars of bond funding for Career Academy grants in FY12. Schools, businesses, and community leaders are encouraged to come together and apply for a Career Academy in their area.

Over the last few years, these grants have been instrumental in expanding the number of Career Academies statewide. Since 2006, twenty-three communities have received much needed start-up and equipment funding. Today we have College and Career Academies throughout the state that, through a charter, are providing specialized career pathways and increased relevance in their coursework for Georgia's high school students.

As in previous years, the TCSG will manage the solicitation of grants and will also handle the distribution of funds to the award recipients. To assist in preparing for the grants, the TCSG will be holding a Career Academy Grant Application Workshops. This grant application workshop will provide information about the Charter application process, as well as answer questions about accounting for grant funds. The training session will be held at the TCSG Offices in Atlanta.

The Workshop will be held on July 1st at 9AM on the third floor of the TCSG and will conclude around lunch time.

Confirmed Tandberg locations are Central Georgia Tech (Putnam Campus) and Southern Crescent Tech (Griffin Campus) with other sites pending.

For additional details about the workshop or to register, please contact Sharon Haworth at shaworth@tcsge.edu or 404-679-1689.
