December 9, 2010

IPDP Members,

IDEM has put together a self inspection calendar to assist CAFO operators in their required record keeping activities throughout the year. The calendar was put together to act a resource tool to assist CAFO's in meeting their regulatory obligations for onsite self monitoring and record keeping. This calendar has the required information for daily and weekly monitoring that is to be maintained in a CAFO operating record. By using this calendar to organize results from self monitoring inspections, your IDEM compliance inspector will have all the necessary information regarding onsite self monitoring that they will be checking during a compliance inspection.

Producers are not required to use the self inspection calendars provided by the agency, if producers have adopted different record keeping management on their facilities that is ok as well. If you are using a different type of record keeping you should take this opportunity to verify that you are keeping all the required information in your operating records.

If any producers have questions or concerns regarding their record keeping or anything else pertaining to your environmental compliance feel free to give me a call 317-232-8587. I hope everyone has a great holiday season and I look forward to working with and assisting members of IPDP in the coming year.

Thank You,

Andy Tauer
