

Spend an entire day with us learning theory and practical applications of Apitherapy in conjunction with the Eastern Apicultural Society. To be held at West Chester University, West Chester, Pennsylvania. Register on the EAS website at [www.easternapiculture.org](http://www.easternapiculture.org)

### Apitherapy Workshop Schedule

Merion 113

7:00-8:30

Breakfast (Cafeteria)

8:00-8:30

Apitherapy Overview and Beekeeping

8:30-9:00

Pollen and Bee Bread

9:00-9:30

Propolis: Collection, Preparations, and indications

9:30-10:00

Break (Vendor Area)

10:00-12:00

Bee Venom Therapy: Applications & Technique (informed Consent Form for people participating in afternoon Bee Venom Workshop)

12:00-1:30

Lunch (Sykes)

Merion 113

1:30-3:00

Bee Venom Therapy Practical Demonstration

Break (Vendor Area)

3:30-5:30

The Colors of Propolis & Salve-making Workshop

**Frederique Keller**, DOM, L.Ac, is the current President of the American Apitherapy Society. Frederique holds a Master of Science in Oriental Medicine and is a Licensed Acupuncturist, as well as a Medical Herbalist in Long Island, NY. She has also been a beekeeper for 20 years and uses bee venom therapy for a variety of disorders. She incorporates the products of the hive in her treatment protocols. Frederique has traveled extensively and has done post graduate studies in China and India in the fields of Traditional Chinese Medicine and Classical Homeopathy.

**Craig Byer** of Huntington, Long Island has been fighting for environmental sustainability for years. Craig is a protester and educator on environmental issues such as GMOs, fracking and renewable energy. His most noteworthy contribution to environmental conservation is his five years of experience as a beekeeper. Byer's relationship to beekeeping is ironic, as he came into the field from his family pest control business! Byer incorporated efforts to save honey bees into the family business and Suburban Pest Management LLC has evolved into a fully-fledged honey bee operation with 40 hives. In addition to lectures on the medicinal properties of raw honey and bee venom therapy, Byer transports observation hives to farmers' markets and educational facilities to raise awareness of the importance of honey bees. Byer's interest in apitherapy was an accident of sorts, as it took one sting for him to recognize the healing properties of bee venom. He is a strong believer in honey's health benefits. As a Board Member of the American Apitherapy Society, he is dedicated to the advancement of apitherapy and is working towards his goal of becoming a certified apitherapist. In addition to his love for bees and environmental conservation, Byer loves spending time with his five year old "princess bee" daughter Sophia, his goofy St. Bernards, and anyone who respects nature.
