

COURSE ANNOUNCEMENT

Course Number: FRNSC112

Course Title: Digital Evidence for First Responders

Course Description: This course is intended to introduce students to the field of digital forensics and the important role the first responder holds in identifying and securing digital evidence. Students will learn the general methodologies utilized in the field of digital forensics and develop knowledge on the various layers where digital evidence is located and how the first responder can quickly identify this type of evidence. More importantly, students will learn proper procedure for the collection of digital evidence. Students will discuss the appropriate legal procedures when faced with digital evidence and review current challenges for law enforcement when dealing with this type of evidence. Additionally, students will learn about contemporary issues in technology and how it affects present-day law enforcement. Class size is limited to 20 students.

This course has been submitted to Pennsylvania Coroners' Education Board for eight (8) hours of continuing education under the provisions of Act 22 of 1988. Approval is pending.

Date: Thursday, May 9, 2013
