

**This is a conversation for MEN ONLY so if there are women reading... well, I apologize for the direct conversation.**

**As we age, testosterone levels diminish. This has a lot of consequences including weight gain, loss of energy, mood changes and there are even studies that show we are more susceptible to getting ill.**

**Those are all pretty horrible but a real nightmare for red blooded men is thinking they may eventually have a loss of sexual function. OK, let's not panic and start talking crazy. Even a slowing or a gradual diminishing of the urge or the way our equipment works is something that can happen as we age and it strikes fear in our hearts. When we are young, just the thought of having sex gets all systems at full alert, almost without conscious thought. The older we get the less that happens. Eventually you may notice you aren't getting as hard and it takes longer to get fully aroused. It's not a loss of function but the sensation isn't as electrifying as it used to be.**

**One thing that can really help break you out of the funk is the natural testosterone product called 2TX. Some of you may have already tried that and it does increase testosterone levels.**

**There is another product that you can find at Max Muscle that has a more dramatic affect in the sexual function department. It's called HERBAL MALE. If you take this product an hour or so before having sex you**

**will feel much more sensation and also blood flow is greatly enhanced. It lasts for many hours so there is no need to rush things. This stuff literally makes you feel like you did when you were a lot younger. You may not even realize you've lost a lot of feeling and sensation because it happens so slowly over a long period of time. This product will bring back the sensation and feelings you had when you were young. Give it a try. You have nothing to lose and a lot to gain.**

**Scott**
