

Light-Life® Testimonial

As promised, the tools are already being put to good use here. Tropical Storm Flossie (July 2013) ripped its way through the Islands this week, however thanks to the Light-Life® Harmonizers and the Light-Life® Rings, Oahu, Hawaii, got through it unscathed.

The Big Island, Maui and Molokai all got slammed and lost power. Maui got struck by hundreds of bolts of lightning. A roof was punctured by lightning and another man got struck by lightning when he turned on his kitchen faucet. So needless to say when I saw the string of rapid lightning flashes coming our way over the ocean from the East, I was pretty concerned about what was coming our way.

I am an energy worker and one of the modalities I use is Matrix Energetics (ME). In ME we have a technique where we "borrow" the energy of something and use it to transform a situation. I didn't particularly want to stand outdoors with a metal ring when an electrical storm was approaching, so I "borrowed" the energy of the large Light-Life® Sacred Cubit Ring and scanned the storm while sitting in my living room. Lightning and thunder stopped immediately and never reached our town.

I ran a request through the Manifestation Ring that the storm dissipates and we only get moderate rain and light winds. That night, instead of torrential rain, thunder, lightning and high winds, we had intermittent normal rain and occasional gusts of perhaps 20 miles per hour. I also "borrowed" the energy of the gold Light-Life® Ring and infused it into my fence, which is wobbly and in need of repair, and it survived the wind and rain intact.

I know of at least 3 Light-Life® Harmonizers which were running here on the Windward Side of Oahu. I was running my silver Environmental Harmonizer and gold Agricultural Harmonizer, and a friend, who purchased an Environmental Harmonizer upon my recommendation a few weeks ago, ran hers also. What was interesting was watching the satellite photos over the hours as the storm made its way towards us. The storm "blew up" over Maui with some very frightening consequences—Maui is just out of range of the Agricultural Harmonizer. It started losing strength over Molokai, which is within range, though the entire island did lose power. And as it made its way over the ocean towards us, it fell apart. As I stated earlier, we received intermittent normal rain and occasional moderate gusts of wind.

Looks like more storms are forming in the Eastern Pacific—so it feels like we are going to have an active Hurricane season this year. I am prioritizing getting a Light-Life® Storm Chaser as it looks like we're going to need it here in Hawaii this year. While I'm grateful that we here on Oahu were spared from any damage, I can't help but feel that the Storm Chaser would have spared the other islands, especially Maui (and the poor man who was struck by lightning), from the damage they sustained.

I've never been a big spender but I'm committed to investing what I can into these tools. Even though I've been working with them for a few short weeks they have made a tremendous impact here. I'd budgeted for a new stove, refrigerator and car this year but between all that I've already invested and then getting the Storm Chaser and Light-Life® Matrix 22, looks like we'll have to hang in there a little bit longer...(Looks like some more things I can run through the Light-Life® Manifestation Ring!) ;-)

I am deeply grateful to Slim for creating these tools and to you, [Katharina] for continuing to make them available to us!

Aloha,
KY from HI

P.S.: I have fallen in love with the Light-Life® Ring treated water. The first time I tasted it I remembered the water at Kiyomizudera, a temple in Kyoto, a place I'd visited many years ago with my mother. Kiyomizudera stands over 3 waterfalls and visitors can catch the water and drink it as it falls. I've always remembered the taste of that water and longed to drink it again anytime I've seen pictures of Kiyomizudera. They say that the water there has wish-granting properties. The Light-Life® Ring treated water tastes the same as I remember the water at Kiyomizudera. So I've realized that the ring water tastes of the Zero Point Field or the Field of Infinite Possibilities (!!!). I feel so blessed to be able to drink this water every day. Thanks again to you and Slim!
