

Skyfall Movie Review

By: Ramya Mylavarapu

One of the best Bond films ever made, it has a well-formed cast all working at their best which only adds elegance to the action filled, but intelligent script.

Sam Mendes brings his extraordinary talent to the Bond franchise and he does not disappoint. Beautifully stunning cinematography, a great script, and explosive action pieces, 'Skyfall' is the real deal. Replacing the cluttered action pieces with a little more character development helps the overall outcome of the film and provides a great villain in Javier Bardem. Daniel Craig plays Bond with a brooding charm that proves unmistakable, and all other supporting players, especially Whishaw as the new Q and Fiennes, are very complimentary. Mendes injects a certain amount of kinetics and smarts that the franchise really needed, creating not only a good Bond film but also a great film in general. By far and away the most beautiful Bond film to date.
