Engineering, Landscape Architecture and Environmental Science

## **Water Resources Engineers and Scientists**

Milone & MacBroom, Inc. is a growing multidisciplinary engineering, planning, landscape architecture, and environmental science consulting firm. We provide a comprehensive benefits package, competitive salary, opportunities for advancement, and a pleasant and cohesive working environment.

We are seeking qualified, motivated individuals to work in our Water Resources group at our corporate office located in Cheshire, Connecticut. Candidates will have the opportunity to work on a wide range of projects with a multidisciplinary team to analyze and design river and wetland restoration projects.

<u>Water Resources Engineer</u>: Bachelor's degree in Civil Engineering with four or more years of water resource-related experience, proficiency in AutoCAD, computer modeling, excellent written and communication skills. Emphasis on hydrology, open channel hydraulics, and engineering design.

<u>Senior Water Resources Engineer</u>: Bachelor's degree in Civil Engineering with eight or more years of water resource-related experience, proficiency in AutoCAD, computer modeling, excellent written and communications skills. Emphasis on hydrology, open channel hydraulics, and engineering design. Professional Engineer licensure required.

**Environmental Scientist:** Bachelor's degree in Environmental Science or Natural Resources Management with two to five years' experience in wetland delineation, ecological assessments, and field work. Proficiency in global position systems and geographic information systems with excellent written and communcations skills. Master's degree and USACE wetland certification preferred.
