## Backup best practice =

Backup locally and online. Second best is to backup in whatever fashion will actually get done and performed reliably. The Metron Online Backup Services is awesome: Just set it and forget it!

Avoid the "I forgot to again". Avoid the risk of "My laptop was stolen and so was my backup drive because it was in the same bag".

According to an online source... 31% of PC users have lost all of their files due to events beyond their control. Don't let this be you.
