

**Chairperson , Department of Epidemiology and Health Promotion
New York University College of Dentistry**

New York University College of Dentistry, one of the most dynamic and robust dental educational and research institutions of higher education in the world, is seeking an accomplished and active researcher with a strong background in academia and academic leadership as chairperson for its Department of Epidemiology and Health Promotion. Continued success in obtaining grants and significantly contributing to the literature in social determinants of health, community- and population-based interventions, dissemination and implementation science, public health policy, or other related fields is required. Past history or future plans for research directly in the field of oral health is not required.

Establishing a clear leadership vector is critical, as is the ability and desire to expand the department's and college's integration within a dynamic and ascendant global university. The chairperson will have the opportunity to launch a collaborative and synergistic relationship with NYU's recently formed Global Institute for Public Health.

The department currently sponsors a Master's degree program in clinical research, will soon sponsor/co-sponsor a Master's degree program in evidenced based therapy, participates in the Masters in Public Health Program (with an emphasis in global public health), and provides academic leadership and support for the college's DDS program. Opportunities will be available for participation in the future university-wide Ph.D. program under the direction of the new Global Institute of Public Health.

A highly competitive salary and professional package will be commensurate with qualifications and experience. NYU offers excellent benefits. Applicants should submit a letter of interest and curriculum vitae, via mail or email, to the chairperson of the search committee: **Richard E. Heyman, PhD, Professor, Department of Cariology and Comprehensive Care, New York University College of Dentistry, 380 Second Avenue, Suite 301, New York, NY 10010**, or via email at: Richard.Heyman@nyu.edu.
