

Help Us Save the Earth by Recycling Bottle Caps!

Did you know that most plastic bottle caps are not recycled?
Since there are no other recycling programs for bottle caps,
they are simply tossed away, causing massive pollution.

Bedwell Green team, in cooperation with the Aveda Corporation, will be collecting caps. These caps will be recycled and used to create new caps and containers.

Help us do our part by collecting bottle caps and sending them in to school.

We will be collecting caps from common household items such as:

**Shampoo containers
Soda and water bottles
Lotion containers
Detergent containers**

Please do not send in flexible caps, such as the ones on margarine containers, or metal caps. Also, please only send in clean caps!
