

**Lilly F. Phillips, President  
Alegre, Inc.**

As a long time Daytonian, Lilly has enjoyed much success in her hometown. She attended Chaminade Julianne High School and graduated from Ohio State University with a Bachelor's of Science degree in International Business and Marketing. Upon graduation she began working in Dayton with a Mexican manufacturing group to establish License Agreements for supply of assemblies to the Mexican Automotive market. She met her future husband, Don Phillips, at this company and they married in 1991.

In 1992, a desire to start her own business lead Lilly to establish Alegre, Inc. Headquartered in Miamisburg, Ohio, Alegre has served as a component parts and assemblies supplier to niche manufacturers across the United States for more than 20 years. Since its inception as a woman-owned small business, Alegre has expanded into warehousing and distribution of components to the North American Automotive Industry. Today, with sales of \$18 million Alegre works with manufacturers across North America and Asia.

Lilly has also lent her support to her community including Incarnation Church, the Boy Scouts of America, and the Puerto Rican Cultural Society of Dayton.

While years of hard work have resulted in accomplishments in business, Lilly considers herself truly blessed in her personal life. She credits her ongoing success to the continued support of her family. Lilly continues to work with her husband, Don who is a Manufacturer's Representative for Alegre, and also owns Don Phillips & Associates. She is a devoted wife and mother to their three children, 2 step sons, daughter-in law and grandchildren.
