### **CW (Morse Code) is Discouraged**

Amver address: AMVER

Due to the decline in its usage, the number of Coast Stations supporting it, its high cost, potential for error, and the mandatory carriage of upgraded GMDSS Communication Capabilities, ships are discouraged from using this medium.

For more information regarding Amver reporting, please visit the new Amver web site at:  
<http://www.amver.com>.

So what you are looking at is from the AMVER Manual (Revised 01-05), page 5, 1<sup>st</sup> paragraph.

Yes sir boys and girls, a tear drops from ye ole eye, especially when I read the part that says, "...potential for error," and to think that before the ye ole birds in the sky and HF TTY, CW was how it was done. Any of you former R/Os out there wanna take issue with this cause I certainly do. Least we forget, the world of modern communications was founded on ye ole dit, dit, dash, dash.

73s from the Code Factory.
