

# Tourette Syndrome Awareness Month

**May 15 – June 15**

Please join the  
Tourette Syndrome Association along  
with the hundreds of thousands of  
families affected by Tourette Syndrome  
to raise awareness of this much  
misunderstood and misdiagnosed  
neurological disorder. Marked by  
involuntary body movements and vocal  
sounds called “tics,” it is estimated  
that some 200,000 Americans have  
TS, with millions more manifesting  
associated conditions.
