HEALTH™
ACCESS GROUP

New affordable healthcare option available to Bothell area employers

Health Access Group™ offers employers a low-cost way to give a primary healthcare benefit to their employees. These cost-effective plans are ideal for businesses without health insurance and work well with high-deductible plans.

A Health Access Group Access Card™ plan provides a set menu of healthcare services for a low monthly rate. The employer-funded plans provide access to a primary care clinician for office visits, many common labs and services, and includes a comprehensive annual exam with screenings for heart attack, stroke, and diabetes. Additional services and equipment not included in the plan are provided at low, published prices.

Patients see the same provider, who knows them, has their records on file, and can provide continuity of care. Providers take time with each patient and ensure that there are no long wait times for appointments.

Health Access Group plans are not insurance, but private contracts for medical services. Businesses can sign up with as few as two employees to enjoy a healthier, happier workforce, and to offer a meaningful healthcare benefit to their employees.
