

Location: THE CARRIER DECK

01/30/2010

During the inaugural nightFlight investigation a female guest investigator felt someone gently pull her hair away from her neck. Immediately she turned to see who was there and no one was near where she was standing.

Temperature in the area was 64°.

The rest of the room was at 68 ° and 67 °. A/C was not on.

02/07/2010

During the investigation it was again reported that someone touched a guest investigator on the neck. The guest also reported a sharp cold feeling over his/her body.

Temperature in the area was 62 °.

The rest of the room was at 68 °.

02/13/2010

While standing in the same spot as the affected guest investigators on 01/30 and 02/07, a male guest investigator also felt as if he were being touched and said he had a very cold feeling all over his body. He asked to sit down for a moment to collect himself.

Temperature in the area was 64 °.

The rest of the room was at 67 °.

An audible activity in the corner of the room behind the Corsair was described as a rustling sound. No one is allowed in this area as it is off limits. Investigator also reported a scratching noise as well. Nothing was captured on full spectrum or infrared photography but the noise was recorded.

02/27/2010

A female voice was heard in the corner behind the Corsair followed by a double knock a few seconds later by the entrance door.

After entering the Fun with Flight area, investigators noted a ball (used in one of the exhibits) fell and, after replacing it, the ball fell on command three consecutive times. After being replaced for the fourth time, it did not fall again for the rest of the night.

Before entering the Carrier Deck, an API lead investigator stopped to inform guest investigators of areas in the room to monitor. As this was occurring, a guest investigator looked through a window into the room and reported seeing a woman in khaki pants and a dark colored shirt with short hair standing in the room holding a clipboard. After entering the room, the investigation team noted that no one was present.

04/03/2010

An infrared camera captured an energy spear moving through the air from one camera's view to another camera located in the briefing room in the Carrier Deck. An EMF detector picked up the energy as it entered the room and interference was recorded at the same time on a digital voice recorder.

03/05/2011

At the end of the investigation night a cell censor went off when it picked up an EMF field. This occurred directly after a voice was heard coming from the corner at the rear of the Corsair. When asked, "Can you tell us your name?" an audible voice was heard by more than one investigator in the room. They all agreed

it sounded like it said “Melissa.”

At 01:05 a.m. after saying goodnight and expressing that the team was leaving the room, a voice was recorded on a DVR. The voice said, “Don’t do it” and spoke with a British accent.

10/29/11

A. Start time: 10:58PM. Initial Temp: 73. Lead investigator: Nick. Occurrences: Multiple EMF readings on Cell Sensor. Faint shadow seen and footsteps heard coming from back corner of room.

B. Start time: ?. Initial Temp: 69. Lead investigator: Lisa. Movement in North Hangar seen through window. Guest felt cold.

C. Start time: ?. Initial Temp: 71-72. Lead investigator: Cliff. Guest felt disoriented, had hard time breathing, and her feet felt weighed down.

Location: OFFICERS CLUB

01/30/2010

A guest investigator reported feeling anxious and she felt compelled to move to another seat. After changing positions several times over the next several minutes, she began to sob, saying her heart hurts.

She said the feeling was “not her own” and she was feeling “someone else’s sadness.” Her hands were sweating and numb. She had to leave the room. It took several minutes for her to calm down before returning to the room. She started feeling the same way again; she said she had the “feeling of a broken heart.” She left the room again and did not return for the remainder of the investigation.

02/13/2010

The investigation team entered the O club at 12:15 a.m. At around 12:30 a.m. the first signs of response were received with loud knocks coming from behind the bar. Shortly after, a voice was heard from the back corner of the room. At 12:42 a.m. a female guest said she was feeling very strange and that she felt a “profound sadness come over” her. She remained in the room for a few more moments before saying “I must get out of here.” She left the room and did not return.

02/27/2010

While conducting an EVP session all team members heard a voice coming from the back of the room. A guest investigator walked back to that corner but found no one was in the area.

10/29/11

A. Start time: 11:14 PM. Initial Temp: 72.3. Lead investigator: Nick. Popping and creaking sounds heard in corner of room at same time as Cell Sensor (EMF Detector) alerted. Guest L. played piano. Then she felt a BIG chill when Nick started trying to communicate to a “Melissa,” which continued for several minutes.

B. Start time: ?. Initial Temp: 70. Lead investigator: Lisa. Guest had strange feeling upon entering room. Guest C. played piano and his hands got very cold. An unexplained light was seen moving across wall by doors. Guest experienced extreme cold alternating from arms to hands and vice versa.

C. Start time: ?. Initial Temp: 70. Lead investigator: Cliff. During EVP session, Cliff requested, “If you are not a female, please make a noise.” A loud “clank” noise followed this request. Guest started playing piano, and a hissing sound was heard, followed by a click. Cliff asked, “Can you make that sound again?”

The sound was heard a second time as if in response to the question.

Location: IMMERSION & WWII/B-17 AREA

01/30/2010

During the investigation in the briefing tent, heavy knocking was heard when asked to make noise. At 11:45 p.m. a metal object fell to the floor in the briefing tent area. It resembles an element from a military uniform but could not be identified as such.

02/27/2010

During the investigation inside the B-17, a clicking noise was heard from the waist guns shortly after a male guest investigator complained of severe heartburn he had never experienced this in the past..

Investigators saw shadows moving in the B-17 room, in simulated wooded area to the left of the aircraft. Investigators checked the room to see if anyone could have created the shadows and they were unable to reproduce them.

03/13/2010

Inside B-17, a speaker was heard clicking nonstop. While the team was in the aircraft, a rustling noise came from the back of the plane in the tail gunner's position.

03/27/2010

During an EVP session inside the B-17, loud female voices were heard outside the aircraft as if they were entering the room. An investigator checked to see if someone had entered the room but no one was there. The voices were heard by several team members inside the B-17.

* During two different API investigations female voices were heard outside the B-17 while investigators were inside conducting an EVP session.

04/03/2010

While investigating in the briefing room, several investigators heard someone whistling outside around the B-17. The area was checked and no one was present.

*At the end of the night while packing up the equipment, a Lead Investigator heard someone whistling "Amazing Grace" when he entered the B-17 room.

03/05/2011

A strange mist was seen in the area containing the runway simulation in front of the B-17. No cause for the mist was discovered. No smoke machines or any other effects were running at the time.

Location: NORTH AND SOUTH HANGARS

10/29/11

Start time: 11:57PM. Initial Temp: ?. Lead investigator: Nick. In North Hangar—Guest felt a head rush and dizzy feeling when touching stair rail to Short Sunderland. Guest felt a heavy feeling when entering North Hangar and got EMF reading on K2 meter. Heard faint whistle and unexplained dragging sound. Footsteps, shuffling, and metal clanging sounds heard around German aircraft and M*A*S*H helicopter. In South Hangar—Guest heard laughter and EMF detected on K2 meter during EVP session.

Start time: 11:00 PM. Initial Temp: 75.6. Lead investigator: Lisa. In North Hangar—Sounded like someone was moving around and heard knocking sounds around side of plane, and the temperature

dropped 3 degrees. Lisa knocked on side of plane and said, "Please make this sound again." The sound of knocking came back as if in response, which was then followed by a cold spot around the plane. In South Hangar—A knock was heard on catwalk and an exhalation sound at the same time, upon the team's entrance into the hangar. One guest felt "weird" at the bottom of the stairs. Then two guests (including Guest D.) saw a reflection move across the floor, blocking the light. Another guest saw a shadow move and then heard a pounding sound. Team heard a metal bang coming from the hallway and went to explore, finding a set of metal stairs. Lisa asked, "Can you make that sound again?" and heard the same unexplained metal bang come from the stairs.
