

Family Astro Constellation

SAVE THE DATES & REGISTER FOR THIS SPECIAL HEALING OPPORTUNITY!

Family Astro Constellation is an opportunity to work deeply with current issues and have the opportunity to be witnessed at the roots of our deepest patterning, so that we arrive at a greater freedom. The planets are arranged, in real time, as they were during the date and time of your birth. Each planet represents an aspect of our relationships. We choose people to hold the space for whatever the planet represents (i.e. mother, father, etc.) From here we enter into another space and time, and the magic begins. We travel our way through the depths and hidden spaces in ourselves to expand and be more whole. We interact with each planet and experience deep release and transformation.

Testimonials

If you have been wrestling with a certain question, experience, or your path in life, this weekend is for you. What I loved most about it was that it was completely genuine and came from a divine power. It is truly about what your SOUL wants YOU to listen to, discover and embrace; not what someone else wants you to experience. The constellation will be one of my all time biggest healing and transformative experiences of my life.

- Christina

Tibetan pulsing was deep cleansing work which helped me to dislodge some old "stuff" and stories...It was a beautiful form of awakening...The constellation work is nothing I have ever experienced before... so insightful and life changing!!! You actually get to re-experience a part of your life, to work out what didn't the first time around...
