Wednesday, October 3

9:30 am – 1:00 pm

Introduction to Campaign &
Hands-On Training

11353 Bunche Hall

UCLA

Box 951487

Los Angeles, CA 90095-1487

2:00 pm – 4:00 pm

Meetings with offices of
California Senators (details TBC)

What's in it for attendees?

- Practical training in grassroots advocacy
- Networking with a passionate group of volunteers from the Los Angeles area
- The opportunity to meet in-person with your elected officials
- Good food and good conversation!

Shot@Life, a campaign of United Nations Foundation, is a movement in support of global childhood vaccines.

We are standing up for childhood — and we need your help! Vaccines are one of the best tools to fight diseases like polio and improve the lives of children around the world, but millions of children still lack access because of funding shortages.

Eradicating polio has proven particularly tricky. Despite reducing polio by 99 percent, the global community has not been able to eradicate it once and for all. We have entered emergency mode and know that your passion and influence can create immediate awareness for this urgent need.

Make your voice heard. Join us for a morning hands-on workshop to learn how you can take action to ensure every child gets a shot at a healthy childhood. After the workshop, we'll go as a group to lobby California elected officials, because the global vaccines message is most powerful when it comes from constituents like you!

We are reaching out to you as a respected and influential member of your community. You care about these issues and people trust you for information. We would love to have you join us. If you are interested in attending, please email info@shotatlife.org for more information.

Shot@Life educates, connects and empowers Americans to champion vaccines as one of the most cost-effective ways to save the lives of children in developing countries. By encouraging Americans to learn about, advocate for, and donate vaccines, the United Nations Foundation's Shot@Life campaign will decrease vaccine-preventable childhood deaths and give children a shot at a healthy life.
