FOREST CONSERVATION DAYS OUTDOOR EDUCATION FIELD TRIP

The **Northern California Society of American Foresters** invite Girl Scouts to take a nature hike lead by a Resource Professional or college student on October 5. All of our guides are volunteers.

This program is designed to reduce the disconnect our children have with nature. This is a **FREE** field trip. Come and work towards earning **BADGES**.

GIRL SCOUT BADGES

JUNIOR

Animal Habitat

The wildlife booth along with a nature hike will give the experience of what different animal habitats look like in the wild.

Flowers

The web of life is a focus throughout the day and explains how photosynthesis plays a part in our environment. During the nature hike an abundance of plant life will be identified, including different species of flowers.

CADETTE

Trees

Trees play a major role in the **Forest Conservation Days** and are one of the focuses. The forest products display demonstrates what products we use in our every day lives that come from trees. Many species will be identified on the nature hike.

Trees are a natural and renewable resource and key in the web of life.

BROWNIE

Hiker

The main event is the nature hike. This hike is guided by one of our Resources Professionals or college students who will explain the web of life, ecosystems, habitat, wildlife and much much more.

Bugs

Our insect booth has many species and displays many insects from the everyday ant to insects one may never see in the
