

## **RocketHub campaign video 2**

### **script for teacher and student submissions**

Can be visual and voice or just voice

Teacher: “Ah, but a man's reach should exceed his grasp,  
Or what's a heaven for? Robert Browning 1855.”

Can be visual and voice or just voice

Teacher: “Ever since the birth of mankind the celestial heavens have called to us. The launch of the first rockets also launched a new found enthusiasm and need for science, technology, engineering, and math. Students across the nation were amazed, motivated and inspired by the Space Race. July 20th, 1969, 50 million people around the world sat glued to their televisions and radios as mankind took the first step on the surface of the Moon, and American hearts swelled with pride.”

Can be visual and voice or just voice – these sentences can be in separate clips or all in one

Teacher:

“What if you had a tool to spark the imagination of young children?

What if you had the magic to excite a high school student about math?

What if you could give a junior high girl the determination to become a physicist?

What if you could make the difference between “I give up” and “I will try until I get it”

What if you had the ability to improve the education for millions of students across America?

What if you could have thousands of students taught by real astronauts?

What if you could shape the future?

Would you do it?”

Note – we would also love video submissions of close-ups of students to go with the lines above

4 students 1 at a time with visual of the student:

“Would you do it for me?”

Would you do it for me?

And me?

And me?”

Teacher or student: “You can.”

Can be visual and voice or just voice

Teacher: “Teachers in Space creates these student benefits by putting space into the hands of thousands of students and teachers across America every year through several avenues.”

Close of visual with each of the following:

Teacher: I’m (say your name) and I am a Teacher In Space

Student: I’m –[student name]- and I am the future.

Teacher: I’m (say your name) and I am a Teacher In Space

Student: I’m –[student name]-- and I am the future.

Teacher: I’m (say your name) and I am a Teacher In Space

Student: I’m –[student name]- and I am the future.

Teacher: I’m (say your name) and I am a Teacher In Space

Student: I’m –[student name]-- and I am the future.

Teacher: I’m (say your name) and I am a Teacher In Space

Student: “Do it for me”

Student: “And me”

Student: “And me”

Group of students – “Do it for my future.”
