

Math Workshops for Parents

Learn more about how math is taught in classrooms today & how parents can support their child's learning.

Wednesday, April 3rd 7:00 - 8:30pm

St. Peter Catholic High School
750 Charlemagne Blvd. (Charlemagne Blvd & Valin St)

REGISTER FOR WORKSHOP NOW

Two workshops will be offered on this evening at the same time. Choose only one:

Inquiry-based Mathematics in the Elementary Classroom (Kindergarten - Grade 6)

Have questions about how math teaching and learning is changing? Wondering how you can support your child when everything seems so different from your time in school? Come and join a conversation about the ways we are teaching and learning mathematics in elementary classrooms today. Bring your questions and let's talk about math together!

Facilitated by: Susan Davidson, OCSB Educational Consultant (Elementary) Student Success Department

So Much Homework, So Little Time. Why is High School Math So Difficult? (Grade 7 - 12)

Applied, academic, workplace, college or university. Why are there so many choices for high school math and which one is best for my child? Does EQAO matter? SMART boards, graphing calculators, iPods & more. How is technology used in the math classroom? Homework completion or a peaceful household? Vacation in the Bahamas or math tutoring? Join the discussion on these and other tough questions regarding your child and their trip through the high school math curriculum.

Facilitated by: Robert Cop, OCSB Intermediate/Secondary Consultant; Math, Business & Interdisciplinary Studies

Sponsored by the Ottawa Catholic School Parents' Association and St. Peter, St. Mathew & Lester B. Pearson Families of Schools
Everyone is welcome!
