FOR IMMEDIATE RELEASE

Bimba Introduces New Low Power Isonic® V2 Valve

University Park, IL – March 15, 2013 – Bimba Manufacturing Company, an industry-leading provider of pneumatic, hydraulic, and electric solutions, today announced the introduction of the Low Power Isonic® V2 Valve. Building on the strengths of BimbalMead's line of Isonic® solenoid valves, the new Low Power Isonic® V2 valve provides increased versatility for unparalleled performance.

The V2's lightweight, high-strength polymer construction, combined with its expanded voltage options, ensures that every valve delivers long-lasting energy efficient solutions. Improved features also ensure safety and adaptability for use in a variety of environments.

New key features:

- **Power Saver**—Reduce consumption by up to 60%, extend the life of battery-operated equipment, and lower overall operating costs
- **More Choices**—Choose from 3VDC or 5VDC voltages and increase equipment compatibility
- **Universal Fit**—Use in stand-alone applications for further energy savings or with BimbalMead's patented quick-release manifold systems
- **Enhanced Safety**—Reduce the risk of electrical arcing, even in volatile environments

To download 3D CAD files and learn more about the Isonic® V2, visit bimba.com

About Bimba

Bimba Manufacturing is a forward-thinking innovator of actuation technology, specializing in providing cutting-edge solutions to engineering challenges. Including its brands, TRD, Mead, MFD and Pneumadyne, Bimba markets an extensive line of industry-leading products including pneumatic, hydraulic, and electric actuators; valves; fittings; air preparation and a variety of safety and production solutions. In addition to its broad line of standard catalog products, the company's business develops many custom and semi-custom products designed for specific customers and applications. These products, used in machinery and automation, are sold to original equipment manufacturers and end-users throughout the world in an expanding variety of industries.
