

FREE SCREENING OF TWO SUSTAINABLE FOOD FILMS

A pig is shown in a field, looking towards the camera. The background is slightly blurred, showing trees and foliage.

OUT TO PASTURE: THE FUTURE OF FARMING?

&

A pair of hands is shown holding a large quantity of mixed seeds, including corn and other grains.

SAVING SEEDS

Out to Pasture: The Future of Farming? lets several farmers tell their stories about trying to produce meat, milk and eggs in ways that are more sustainable and humane than conventional animal agriculture. Some would view these pasture-based farmers as backward, but they might represent the cutting edge of animal agriculture. (34 minutes)

Saving Seeds profiles one Kentucky farmer who is trying to be part of the solution to the diminishing diversity in our food supply. (20 minutes)
