# Educational Workshop Series

Watershed Monitoring and Assessment

Habitat Enhancement

Conservation Programs

Landowner Outreach and Education

Sotoyome Resource Conservation District has been helping rural and agricultural landowners conserve their natural resources since 1945.

**May 21, 2011**

## RURAL ROADS IMPROVEMENT, *Maacama and Mark West Watersheds*

Learn about our rural roads improvement program. Techniques will be discussed on how you can improve your property's rural roads. Reduction of erosion and maintenance are some of the benefits of applying these methods. An actual site visit will provide you with an opportunity to see an upgraded rural road.

For further information and registration, please contact Playalina Nelson at:

[pnelson@sotoyomercd.org](mailto:pnelson@sotoyomercd.org) or 707.569.1448 x108

**July/August 2011**

## IRRIGATION SCHEDULING, *Location TBD*

This workshop includes hands-on demonstrations on a variety of methods to monitor and track irrigation practices. Proper irrigation scheduling can help you to conserve water, improve the quality of your harvest and save money.

For further information and registration, please contact Valerie Minton at:

[vminton@sotoyomercd.org](mailto:vminton@sotoyomercd.org) or 707.569.1448 x102

**October 2011**

## RAINWATER CATCHMENT, *Mark West Watershed*

Come visit demonstration sites to learn about the principles of rainwater harvesting and how these principles can be applied to create systems of varying scales and purposes. This is another simple and economical program that helps save water and money.

For further information and registration, please contact Valerie Minton at:

[vminton@sotoyomercd.org](mailto:vminton@sotoyomercd.org) or 707.569.1448 x102

**August 2011**

## AUSTIN CREEK PUBLIC MEETING, *Austin Creek*

This meeting will provide you with information on current projects and programs including soil reduction and water quality monitoring. You will also have an opportunity to hear about our upcoming and future programs related to water conservation.

For further information and registration, please contact Francesca Innocenti at:

[finnocenti@sotoyomercd.org](mailto:finnocenti@sotoyomercd.org) or 707.569.1448 x107

**January 2012**

## INSTALLING AND MAINTAINING NATIVE RIPARIAN PLANTS, *Mark West Watershed*

Join us for this hands on demonstration of installation methods for native riparian plants. Learn about the benefits of using riparian vegetation to maintain healthy watersheds and the surrounding land. We will discuss planting techniques, appropriate plant use and materials needed.

For further information and registration, please contact Playalina Nelson at:

[pnelson@sotoyomercd.org](mailto:pnelson@sotoyomercd.org) or 707.569.1448 x108
