NOAA Seeks Comments on a Proposed Rule to Establish a Rebuilding Plan for Red Grouper in the South Atlantic *Comment Period Ends April 30, 2012*

NOAA Fisheries Service is seeking public comment on a proposed rule for Amendment 24 to the Fishery Management Plan for the Snapper-Grouper Fishery of the South Atlantic Region (Amendment 24). The proposed rule for Amendment 24 published in the *Federal Register* on **March 30, 2012** (77 FR 19169). The comment period ends on **April 30, 2012**.

Amendment 24 would establish a rebuilding plan for red grouper in the South Atlantic. The red grouper stock of the South Atlantic was assessed in 2008 through the Southeast Data, Assessment, and Review Process. The assessment determined red grouper to be overfished (population too low) and undergoing overfishing (rate of fish removal too high). The South Atlantic Fishery Management Council (Council) and NOAA Fisheries Service are required by the Magnuson-Stevens Fishery Conservation and Management Act to implement a rebuilding plan within two years after identification of an overfished stock. NOAA Fisheries Service notified the Council of the stock status on June 9, 2010. Amendment 24 would implement a plan that would have an 81 percent probability of stock recovery in 10 years.

Actions in Amendment 24 consider:

- Implementation of red grouper annual catch limits for the commercial and recreational sectors. The sector annual catch limits are based on the Council's proposed allocations of 44 percent commercial and 56 percent recreational.
- Implementation of red grouper accountability measures for the commercial and recreational sectors. Accountability measures are management controls to prevent annual catch limits from being exceeded and to correct overages of the catch limits if they do occur. The accountability measures would close each sector when the sector annual catch limit is projected to be met. If a sector annual catch limit is exceeded, the Regional Administrator would publish a notice to reduce the sector annual catch limits in the following season by the amount of the overage.

- Elimination of the commercial and recreational aggregate annual catch limits and accountability measures for black grouper, gag, and red grouper.
- Revision of the following management benchmarks for red grouper: Maximum sustainable yield; optimum yield; and minimum stock size threshold.

Request for Comments

Comments on this proposed rule must be received no later than **April 30, 2012**, to be considered by NOAA Fisheries Service. See the **Addresses** section for information on where and how to submit comments.

Addresses

Electronic copies of Amendment 24/proposed rule may be obtained from the NOAA Fisheries Service Web site http://sero.nmfs.noaa.gov/sf/pdfs/SGAmend24_121411.pdf, the Federal e-Rulemaking Portal at <http://www.regulations.gov>, or the Council's Web site at <http://www.safmc.net>.

If you would like the files in a different format (such as hard copies), please submit a Freedom of Information Act (FOIA) request to the NOAA FOIA Office. Guidelines on submitting a FOIA request can be found on the NOAA FOIA Web page (<http://www.rdc.noaa.gov/foia/>)

You may submit comments by the following methods:

- Electronic Submission: Federal e-Rulemaking Portal at <http://www.regulations.gov> (select "Submit Comment," then type in NOAA-NMFS-2011-0298 in the "Keyword or ID" box). All comments received are part of the public record and will generally be posted to <http://www.regulations.gov> without change.
- Mail: NOAA Fisheries Service
