USA Doctor Recommend Stem Cell Nutrition

Cliff Minter, DPM

Cliff Minter D.P.m. (retired) graduated from Illinois College of podiatric Medicine. He completed his surgical residency at the Hugar Surgery Center in the Hines Veteran Administration Hospital in Illinois before going into private practice in Ventura, CA. Dr Minter is a national and international speaker on the subject of business and nutritional products.

Stem cells are the most powerful cells in the body. We know that stem cells, once they're circulating in the bloodstream, will travel to any area of the body that has been compromised or damaged and turn into healthy cells. There have been controversial discussions about the new stem cells found in embryos, but the truth is that everyone has adult stem cells in their own bodies. We are all created from stem cells. As a child or a young adult, your body automatically releases stem cells whenever you injure yourself.

That's why you heal so fast when you are younger. After about age 35, we don't heal as fast anymore, because the stem cells aren't released the same way as when we are younger. Stem cell nutrition helps all of us heal our bodies. **If you look at the New England Journal of Medicine, you'll find that the number one indicator of a healthy heart is the number of stem cells circulating in the body. Stem cell nutrition is the organic and all-natural way to stimulate the bone marrow to release adult cells into the blood stream.**

By taking stem cell nutrition, you can **maintain optimum health** and aid your body in healing itself. It's certainly a better way to recuperate from any illness than using prescription drugs, because even when a medication works, it can often be hard on your liver and the rest of your body. Stem cell nutrition has **no negative side effects**. This makes it a powerful approach to healing and good health in general. I found out about stem cell nutrition after someone asked for my opinion on it.

I did some research and found it to be one of the **greatest ways to slow down aging**, we have. Aging is nothing more than the breaking down of cells. Stem cell nutrition combats that action. As cells break down, stem cell nutrition replaces them with healthy cells. **This is the greatest, most natural anti-aging method I know.** I was skeptical at first, but the results I've personally seen in people I've talked with have been wide-ranging. Lots of people have reported an increase in energy and better sleeping patterns.

I've seen people with Arthritis in various parts of their bodies, reverse the disease and people with Asthma end up with their lungs totally clear. One person that was on oxygen almost 24/7 is now totally off oxygen. Two ladies who suffered badly from PMS told me they were 100 percent symptom-free within weeks of starting the stem cell nutrition. Two people I know had "tennis elbow" which usually takes about six to nine months to heal. Within weeks of taking stem cell nutrition, both report their "tennis elbow" is gone. **It makes sense, because stem cells go to whatever area is compromised and turns it into healthy cells.**

I use stem cell nutrition as a preventative. I've noticed an increase in my energy level and an improved sleeping pattern. Stem cell nutrition has zero negative side effects, is very powerful and we know how it works. It's good for children as well as adults. **This is the best, most natural way I know to optimum health.** If you want to use it for prevention, this is the best thing I know for staying healthy. And if you do have health challenges, it's the best way I know of overcoming those and regaining optimum health.

I recommend it to every body.

Personal Experiences

IN 2 MONTHS EVERYTHING IS STABLE!

Peter Tarawa - Tikipunga

I had cancer removed from the left ear lobe internal ear canal 5 years ago. Then it was found after two operations were successful that I had cancer of the larynx four years ago. I had radiotherapy and was told it had cleared. Two years on my voice went croaky, and speech was hard, cancer check showed that the voice box was eaten away by cancer.

Four or five years ago I had to have my voice box totally removed (laryngectomy) at the Whangarei Hospital. When all this happened I took 9 months to get well enough to go back to work. I lost a lot of weight, found it hard to eat normal meals, swallowing was hard, most food had to be pureed fine which I did not like. I was stomach sick most days and my bowel motion had a lot of gas release backside, also a lot of mouth burping. Very uncomfortable most days but I managed to work full time on my job, machine operator same company 30 years McBreen Jenkins name changed to Transfield Services. I also have type 2 diabetes, high blood pressure, arthritis, sore joints, nearly had to wear diapers as I was moving towards being incontinent.

I started on Stem Cell Nutrition (Stemtech) SE2 November 12 2012. Only taking 2 tablets a day that week. After an injury at work, a mower picked up a copper wire which embedded in my right eyeball, I had an operation to remove the wire on November 8 2012. November 9 I was sent to Greenlane for treatment antibiotics first week then SE 2 start from then on till today. Now I have stemflo and SE2 x2 daily, everything is stable now.

I feel really good, eat well, gaining weight, no tummy disorder, type 2 diabetes stable blood sugar 4.1, 6.5, no joint pains, heaps of energy, sleep well, out all day enjoying my outdoor activities including fishing and travel. I am very hard to be caught at home. Out enjoying life, my eye injury is also healing ok but may have lens operation after 22.1.2013. Life is really for living and that is what I am doing.

Stemtech is something my family are wanting to get onto. They have seen me improve in not even two months. I really like my stemtech, its given me health improvement I never thought I would see. It is so easy you take control of your own life.

STEMTECH FOR ALL, FOREVER!

I HAD NOT BEEN EXPECTED TO LIVE!

Roseanna Pope Martin - Kaikohe

Around 13 years ago, my family were told by the doctors "that i had not been expected to live". I had been in hospital for 9 days before a doctor was able to guess correctly and say that I had Steven Johnson's Syndrome. By that time i had lost my eye sight, lost my hearing, lost my hair, lost my fingernails and toe nails. I was unable to have clothing or blankets on me because the weight , was to heavy for my body, my skin and flesh would SLOSH OFF.

From all of that I have been left with glaucoma, blepharitis, neuropathy, diabetes, damage to my heart, lungs and kidneys.

Until I was introduced to Stem Cell Nutrition. I have suffered enormously with agonizing pain in my eyes, gums, hands and feet.

BUT now after 2 and a half months using Stem Cells Nutrition I no longer take Diabetes medication, AND I don't need a stent to be put in my heart, my hands have very little pain and I can work with them.

NO HIGH BLOOD PRESSURE - NO CHOLESTROL - NO ARTHRITIS - NO KIDNEY PROBLEMS

Anne Openshaw - Kerikeri

I am 72 years old and have lived with high blood pressure for 54 years and have suffered with arthritis in my thumb and hands for about 5 years and it was getting more painful than I could bear at times. Also, my kidneys were in a bad state and I had a lot of pain from this and it was looking like I was moving towards being on a dialysis machine.

I started in June taking SE2 x 2 tablets in the morning, then 2 tablets in the afternoon and 3 tablets 1 x a day of Stemflo for 3 months. After the first night I woke up and found that both thumbs were pain free, also, when I went to the toilet I noticed a big change relating to my kidney function and that the pain was beginning to go away. Over the 3 month period I didn't notice any other changes and thought that the products weren't working for me.

I went for a full blood test and when I went for the results the doctor said to me "what have you been doing?" I told her that I was taking Stem Cell Nutrition and she told me to keep going with it as my results were: blood pressure - normal, high cholesterol - normal, borderline diabetes - normal, kidneys - normal. I have increased energy and overall I feel great.

It may seem for some like it's doing nothing, but what it's doing is helping your body heal your body.

PARKINSON DISEASE

Esther Munro - Kaikohe

I was introduced to the stem cell nutrition through a relative. From that point I read up on Parkinson's and how stem cell medication could help my condition.

I started taking SE2 for a month, till I ran out then I rang to find out where to get another lot hence the arrival of Ian and Kelly Adams. I signed up straight away as I wanted my own business. They also gave me a SE2 and Stemflo to help with the circulation and for my blood, as I had run out and they wanted me to continue with the product without a break. I was taking it twice a day.

When the Team Builder Pack arrived I realized I could walk without my Stroller. I couldn't believe it. The pack included (SE2 x2 + Stemflo + ST5 + Dermastem).

Then I decided to go and see my G.P and I mentioned the Stem Cell Nutrition, but nothing much was said about it, so halfway through December I saw my neurologist and she was amazed. I spent just under an hour with her and she said I was very lucky. She had heard of Stem Cell Nutrition and said what works for me may not necessarily work for others. But hey! I'm smiling it's been nearly 5 months since I began taking the stem cell nutrition. I have added the ST5 and using it as a meal replacement as well, I know I have a long way to go.

I now drive and don't need my husband assisted or driving for me anymore, my tremors are going away and the doctors have taken me off my meds. I have to thank my relation for introducing me to Stemtech and the Stem Cell Nutrition products.

Noho Ora mai

NO MORE ARTHRITIS & INCREASED ENERGY

Roger Atkinson - Whangarei

I started using SE2 and after 2 months decided it wasn't working for me, however I soon found that my arthritis was more noticeable than ever and my energy level was on empty. I decided to resume my SE2 and now my arthritis has gone and my energy level is on full.

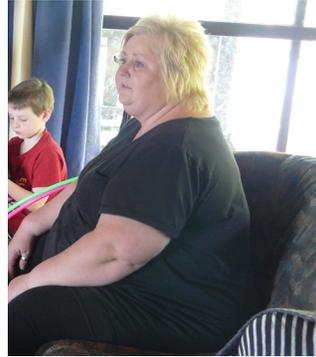

I'm still amazed with what has happened to me in such a short time since I started my the stem cell nutrition.

In May this year I was very sick with being over weight, Type2 Diabetes and high blood pressure and other health related issues. I had started taking epsom salt baths in mid April and over a period of 1 month I lost 20kg and I thought I might have cancer or something else because I've never lost large amounts of weight - never lost that much with Jenny Craig / Sure Slim etc... I also had 14 abscesses on my body, my body was feeling like it was shutting down and I thought I was dieing.

In mid June I started on SE2 and within 10 minutes I felt a warming sensation around my worse abcess and that the pain began to ease, I thought I was imaging it at first. That same night I noticed that the abcess had puss and when I wiped it, it just began to weep the toxins out and by the morning it had stopped and I could touch and put pressure on the area and there was no pain. Four days later without any infections to the open wound it had healed over. As a diabetic this is not normal as wounds take a long time to heal.

I'VE GOT MY LIFE BACK

Kelly Adams - Kerikeri

BEFORE - 145kg

SEPTEMBER - 90kg

Four days later my customers were starting to comment on how well I was looking and that my eyes were bright and white. I was beginning to feel better each day.

I signed up as a distributor as I wanted to have my product at wholesale and wanted to share what was happening to me with family and friends and also my customers.

Once I started on all products: Stemflo, SE2 and ST5 this is when the amazing story really begins. In 5 months my body had lost 55kg as well as type2 diabetes and high blood pressure are all normal. amazing!!! **I have got my life back** and I haven't felt like this for over 27yrs.

With the weight loss (55kg April - September) I have found that I have no major saggy skin and I put it all down to the Stem Cell Nutrition. Thank you Stemtech!

I also use Dermastem for my skin and as a 50yr old I'm continually getting compliments on my skin and how firm and how great it looks. It is never to late to start and you will see the results for yourself, and so will your friends and family.

I'M STILL ON MY JOURNEY!

MORE ENERGY SO I CAN WORK MORE

Tim - Kerikeri

Four years ago I was in the hospital with pneumonia, since then my energy has been very low and it was a struggle to carry out a week of work. Prior to being in hospital I was already living with a compromised immune system causing many frustrating ailments and food ailments.

Since starting on Stemflow and SE2 I feel like I have got my life back. I immediately got an instant increase in my energy and then a steady increase over the past 5 months.

Another benefit has been a major reduction in RSI pain in my right shoulder when I use the mouse with my computer.

I am very very grateful for the major health improvement I have received from the Stemtech Products.

NO MORE PAIN... NO HEADACHES... NO MORE MR. GRUMPY... NO SCIATICA... and a GREAT NIGHTS' SLEEP

Dez Matene - Kaikohe

Kia Ora Korua, I'M SO GRATEFUL!!! I thank the Lord I was introduced to Stem Cell Nutrition.

For 10 years I have had severe back pain, lumbar disc prolapse with radiculopathy.

And Severe Headaches, Sciatica down my left leg, High Cholesterol and also anaemia which leaves me with NO ENERGY. Headaches all day (grumpy). Insomnia, tired and the side effects of the pain killer medication leaving me DOWN feeling useless. It was just so depressing.

Within 1 week of taking Stem Cell Nutrition my pain levels were subsiding, my flexibility and clarity of thinking was returning, my frustration levels had gone down. NO MORE HEADACHES. After 3 weeks NO MORE PAIN.. NO HEADACHES.. NO GRUMPY.. NO SCIATICA.. and a GREAT NIGHTS' SLEEP AND NO MORE PAIN KILLER MEDICATION.

THANK YOU LORD!!!

SPINAL STENOSIS AND BRACHYOLMIA

Joshua Koni - Kerikeri

I'm 15yrs old and suffer from Spinal Stenosis and a condition called Brachyolmia. I have a limited range of movement and in pain everyday. I am unable to bend over and touch my toes, and require help with things like putting on my shoes, picking up things off the floor.

I began taking SE2 in December 2012 and have noticed that not only do I have more energy, but I now have very little pain. I'm starting to run in short little bursts which I never could so as this would cause extreme pain in my feet, also I don't get short of breath as much. I also had very dry skin which has resulted in a pimply effect, this has improved about 50% which I'm really pleased about.

NO MORE PAIN & INCREASED ENERGY & MUCH MORE

David Tarawa - Whangarei

I have been taking SE2 and Stemflo for just over 4 weeks, and in the first week I noticed that my joint pains had disappeared and my bowels were moving regularly (before Stemtech I was lucky if my bowels moved once a week.)

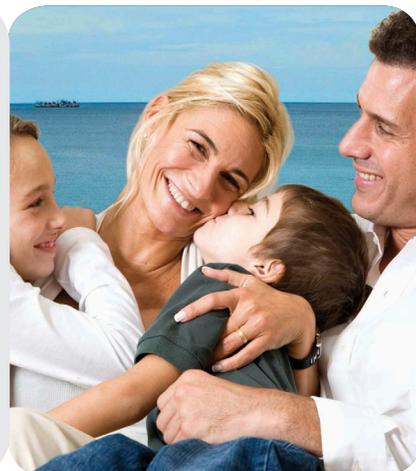

I also noticed that my kidney pains disappeared and after the first week

my energy levels had increased immensely.

I am a type 2 diabetic that was taking Metformin twice a day and for the past 2 weeks I haven't taken it at all, I am yet to check my sugar levels but I feel great physically and emotionally.

I have recommended it to all my friends and family and feel everyone should at least give it a try to see and experience the rewards.

Grateful Stemtech customer.

LOW ENERGY LEVEL

Tom Koni - Kerikeri

I have suffered with a lack of energy due to a heart attack I had 4 yrs ago.

I would come home from working 8 - 5:30pm and would lay on the bed and sleep till the next day if my wife didn't wake me for dinner.

I started taking SE2 and Stemflo in July 2012, since then I have had a significant increase in my energy levels. I don't need the nanny naps anymore.

SPORT INJURY - NO PAIN

Benjamin Adams - Kerikeri

In April 2012 I had a sport injury to my ankle, I suffered alot of pain and it also limited my sport activity, I started using SE2 and ST5 in July 2012.

My energy level increase straight away and three months on the Stemcell Nutrition I have no more pain and able to continue with my sports.

I'm working the Stemcell Nutrition as a business and the company are excellent and very friendly. I have a goal of replacing my day job (Baker) income. This I see as possible and seeing peoples' health and life improve is the best of all.

I'M JUST SO ENERGISED!

Bonnie Harris - Mangamuka

I swear by these products which I have been taking for 5 weeks now.

Before I started on these products I was experiencing shooting pains from my calf's to my knees. Straight away after 2 days the pain had gone.

I also have incredible energy levels.

I'm just so energized! (59yrs old)

ALL OVER WELLBEING

Emily Koni- Kerikeri

Headaches and migranes were almost a daily for me. I had to take 3 - 4 500mg of Nurofen or Ibuprofen every 5 - 6 hrs to cope with it. I would wake up in the morning and my arms would be numb; my husband would have to massage my arms for me.

If I was playing the piano i would get pins and needles in my fingers and sitting for too long my legs would go numb.

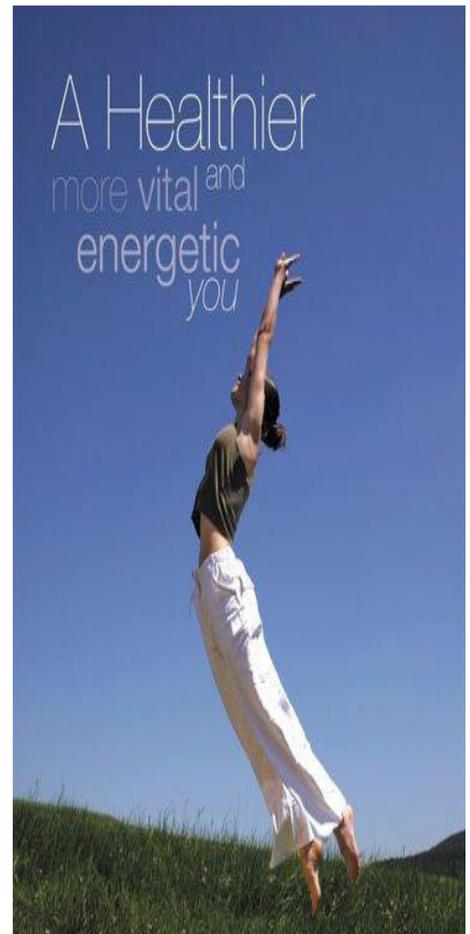

Two days prior to my menstrual cycle I would get severe back ache, almost debilitating and also severe menstrual cramps.

I also suffered with hay fever - itchy throat, eyes, runny nose and excessively sneezing.

I started on SE2 and Stemflo in August 2012 and within two weeks the migraines, pins and needles had disappeared along with a lump that was starting to show on the back of my head.

All the above symptoms have gone and I've also lost 7kgs.

Now when my friends see me, they say that my skin looks so good and my eyes are looking brighter.

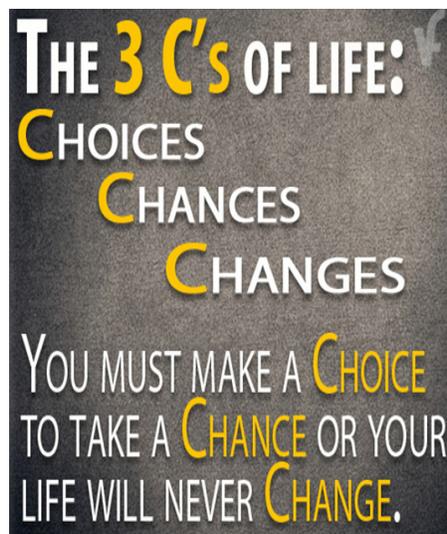

AWESOME RESULTS!

Jim Barber - Mangamuka

Il have a bad foot that has a sore right along the side of my left foot. It was all cracked. I have been trying all sorts of medication, but it just didn't heal. Since I have been taking Stem flo and SE 2, my foot is almost healed. I have been on the products for just over 1 month now.

I used to get up to the toilet many times during the night, that's stopped now. I get a excellent sleep. I used to have a broken sleep. Also my eyes have improved, and I have incredible energy levels. This product really works for me. I can now lift my arms up above my shoulders, which I have not been able to do for such a long time.

This product is awesome. (71yrs old)

Stem Cell Nutrition

JUST GIVE IT A TRY TODAY..

What Have You Got To Lose?

BITTEN BY A WHITE TAILED SPIDER 3 TIMES!

Te Miringa Giffiths - Kaikohe

Kia ora koutou katoa,

My name is Te Miringa Griffiths. I am 61 years old.

In October 2012. I was bitten by a white tailed spider 3 times on the same leg.

The doctors advised me that I could lose my leg (amputation). I was also advised that it would take up to 8 months for my leg to come right. My huge, puffy, swollen, red leg, that looked like it would of gone purple, if I was not introduced to Stem Cell Nutrition.

I was introduced to Stem Cell Nutrition in November 2012. Within 3 days of taking the Stem Cell Nutrition, my leg has gone down (reduced in size), and the color was coming back to normal.

I have also noticed that I have more energy... I am not using my asthma pumps as often as I use too.

Other people have told me "that i'm looking good". I tell them "they too can look good";

...watch this space... ...to be continued...

PET STORY

CATS PERSONALLY CHANGE

We have 4 cats. Three of them have always got on well together, but the 4th one Lyla, the oldest female would not tolerate being in close proximity to the others and was just not playful or looked like she enjoyed her life.

They always have eaten a healthy raw diet and have been in excellent health.

We decided to try the cats on SE2 (1/4 capsu - once a week). Within 6 - 8 weeks there was a major change in Lyla's personality. She became far more tolerant of the other cats, to the point where she can sit on the couch with the others next to her. She also is more affectionate with us and has become very settled and playful.

There were no other changes to their diet or surrounding of the cats.

—Cat owner; Ariel & Tim - Kerikeri

WHAT A MIRACLE!

Liza Kete - Okaihau

Before I started taking these products, I'd had the flu and spent 4 days in bed. I finally came right about a month later, I got the flu again and was in bed for another 4 days. I then went to the dentist to get my wisdom tooth pulled, I was in bed for another 2 days with lots of pain. I was sick and tired of been unwell, so I rang my cousin Tom who is a distributor of the products, and got some SE2 and Stemflo off him.

I also had 2 heel spurs on my left heel which gave me a lot of pain. My left wrist felt numb often. It would get pins and needles all of the time. I also had pain in my right elbow, my right shoulder and my lower back. They all used to ache and throb 5 minutes after I had gone to bed. I hated going to bed, I would take Panadol every time I needed a good night's sleep. I noticed after about 3 weeks of taking Stemflo and SE2, that all of my aches and pains had disappeared. It is awesome to go to bed now. What a miracle!

But the biggest health benefit I have experienced since taking the product, is to do with my lungs. I have asthma and have needed to take 2 puffers twice a day in the past. After 3 weeks on this product, my lungs had never felt so clear. I can now breath deeply, in and out, with no wheeze. I have only taken the puffers 3 times since being on this product. My energy levels are incredible and sustainably all day and every day. My mind is alot more balanced, I feel more mellowed.

I highly recommend this product to every one who wants to have better health. Even if you have no health issues, I highly recommend the product to enable you to have optimal health. Just because we are aging, does not mean that we need to have a lessor quality of life.

Go on, take the plunge. Take you health in your hands and you will be wonderfully surprised. Just do it.

PSORIASIS, MAJOR LEG PAIN, POOR CIRCULATION.

Robyn Liddicoat - Kaikohe

I found out about Stemcell Nutrition after looking into different weight loss options for myself and my family. What I got was a WHOLE lot more.

I caught up with a long time family friend Kelly who had lost over 50kgs on Stemcell Nutrition. I said I have to get me some! I was on it for 3wks when I suddenly realised I wasn't getting anymore pain in my leg, and my energy levels had increased tremendously. I had been seeing a podiatrist because I had a foot roll that caused my leg muscles to be very painful most nights when I lied down, if I did not wear the inserts for my shoes that I was given.

I would lie awake for hours at night because of the pain, often taking loads of painkillers. After the inserts got wet one day I forgot to put them back on, and 2wks later realised I didn't need them anymore. I then realised I hadn't had any more tingling in my my hands, arms and legs, from the poor circulation, nor the hot & cold pains in my legs that used to wake me at night also as they were so painful. Also my psoriasis had cleared up.

Last month I gave my bottle of SE2 to a friend for Christmas as she had been having some ailments, so went without for a month. Within 2wks I had all my symptoms back as well as a major decrease in energy. I got given another bottle at the beginning of the fourth week of going without & by the next day the weeping sores in my head from my psoriasis had dried up and are clearing. I have not had any leg pain or circulation problems yet. I have also seen first hand the major improvements in family members of ailments such as arthritis and diabetes.

This nutrition is TRUELY a life changing gift from God!

IAN & KELLY ADAMS
