CORPSEFUCKING ART- Splatter Deluxe

150 cased/ 1000 bulk

Comparisons have been made all over about these guys sounding like Mortician, and what do you know? They have covered Mortician songs in the past and one band member is even sporting a Mortician shirt on the inside sleeve picture. Despite the fact these guys do have a human drummer, and not a drum machine like Mortician does. Don't worry guys. (C.F.A the Influence has to come from somewhere). I will have to say that it is one of the better Mortician sounding bands that I have heard in a while.

After several discussions and brain storming session the decision was made jointly between FU Records and Rogga to release both albums on one CD. That idea eventually turned into a double CD release which would contain both Forever Underground releases as well as the out of print 'Deadbanger' CD which was released by the now defunct Psychic Scream Records and an unreleased MCD titled 'Warlust' All four of these albums are being released on a special double CD set. Overall this has to be one of the best values in a while as you will get the first four releases by this band for one price.

SCARS OF CHAOS-DAEMONIC ALCHEMY

50 cased/ 300 bulk

Fans of Symphonic Black Metal take note. This is a band that will make their mark in the underground. This is their first official release and is one of the better symphonic black metal albums I have heard in quite a while. Massive sound and production with freezing vocals layered over perfectly composed guitar riffing, amazing technical drumming and flawless keyboard accents make this album one of the best black metal releases of 2005. For Fans of Behmoth,

VENEFICUM-ENIGMA PROGNOSIS

400 bulk only

Devoid of satanic and overused, occult references, Veneficum focus on more philosophic and scientific issues while keeping its musical roots in symphonic blackness. Not as visually colorful as Limbonic Art or early Arcturus, Veneficum's keywork accents their black metal attack rather than gliding it along the astral plane. Veneficum set down a core sound of black metal that is basically Eurocentric, yet with their lyrics and visuals are able to successfully set them apart as an individual band with a unique perspective

Review- Veneficum play great American Symphonic BM. Forget about Dimmu Borgir, etc. These guys don't utilize Satanic or Devil Demon based lyrical content that gets boring after awhile. After one listen, this cd is always the one I keep coming back to. Their vocalist, G. Reymond, adds Death/Black style and sounds a bit like Ihsahn of former group Emperor. One of the few great USBM bands around today, give them a listen.

VENEFICUM- Dysphoria

100 bulk only

The album was produced, mixed, and mastered at Studio Black Aura (Antarktis's own home studio) and the band is very proud of the result. The sound of the band has evolved greatly and new textures are explored while remaining dark, cold, and mysterious.
