

Snow Administration Made Easy? There's an App for that!

iCREWtek™ is a powerful iPhone® based tool you can use to record time and material usage, document site conditions with notes, photos, and client signatures, document weather conditions, and even see where on the map your tasks are.

It also keeps track of where you are as you work, providing a detailed log that can help your clients know that you were on the job when you said you were.

Location use requires your permission. iCREWtek will request your permission before using location services. You can elect not to use these services. We respect your privacy.

It is designed to be super easy to use, and works seamlessly with Include® Schedule Manager™ to make your job easier than ever.

Following are just a few of the features of iCREWtek that will melt your snow headaches.

➤ Clock crews in/out in real-time

iCREWtek™ keeps detailed time records that show which project you were on and allows you to make accurate time and job cost records...

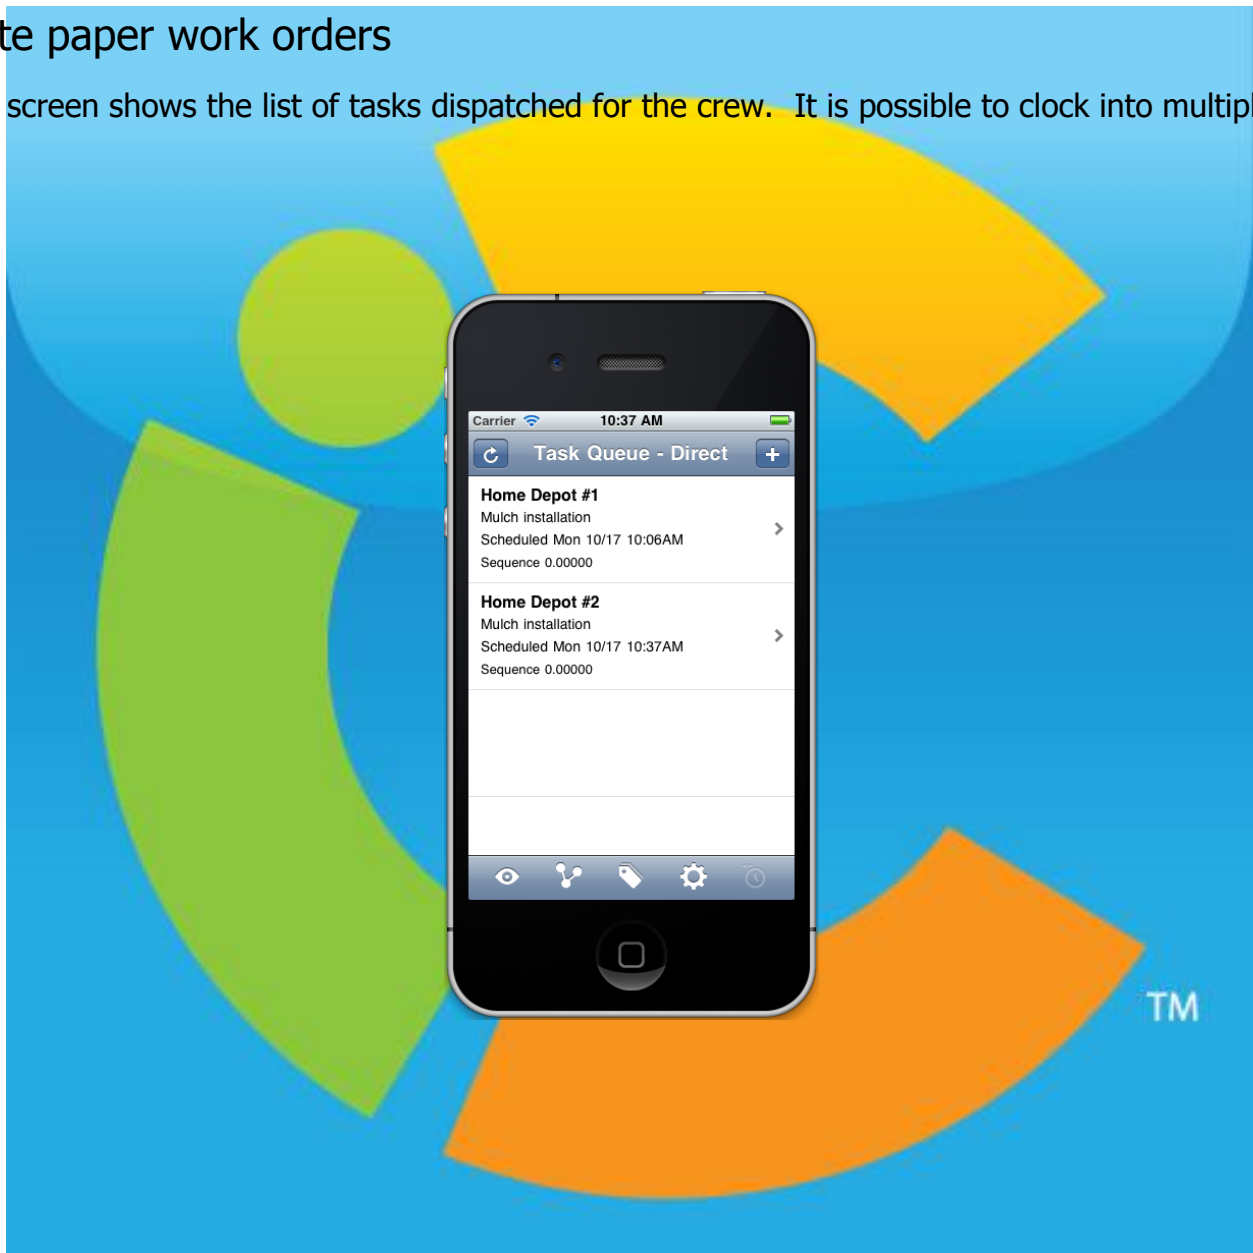

...and updates Schedule Manager in real-time providing a visual display of crew/task activities.

TM

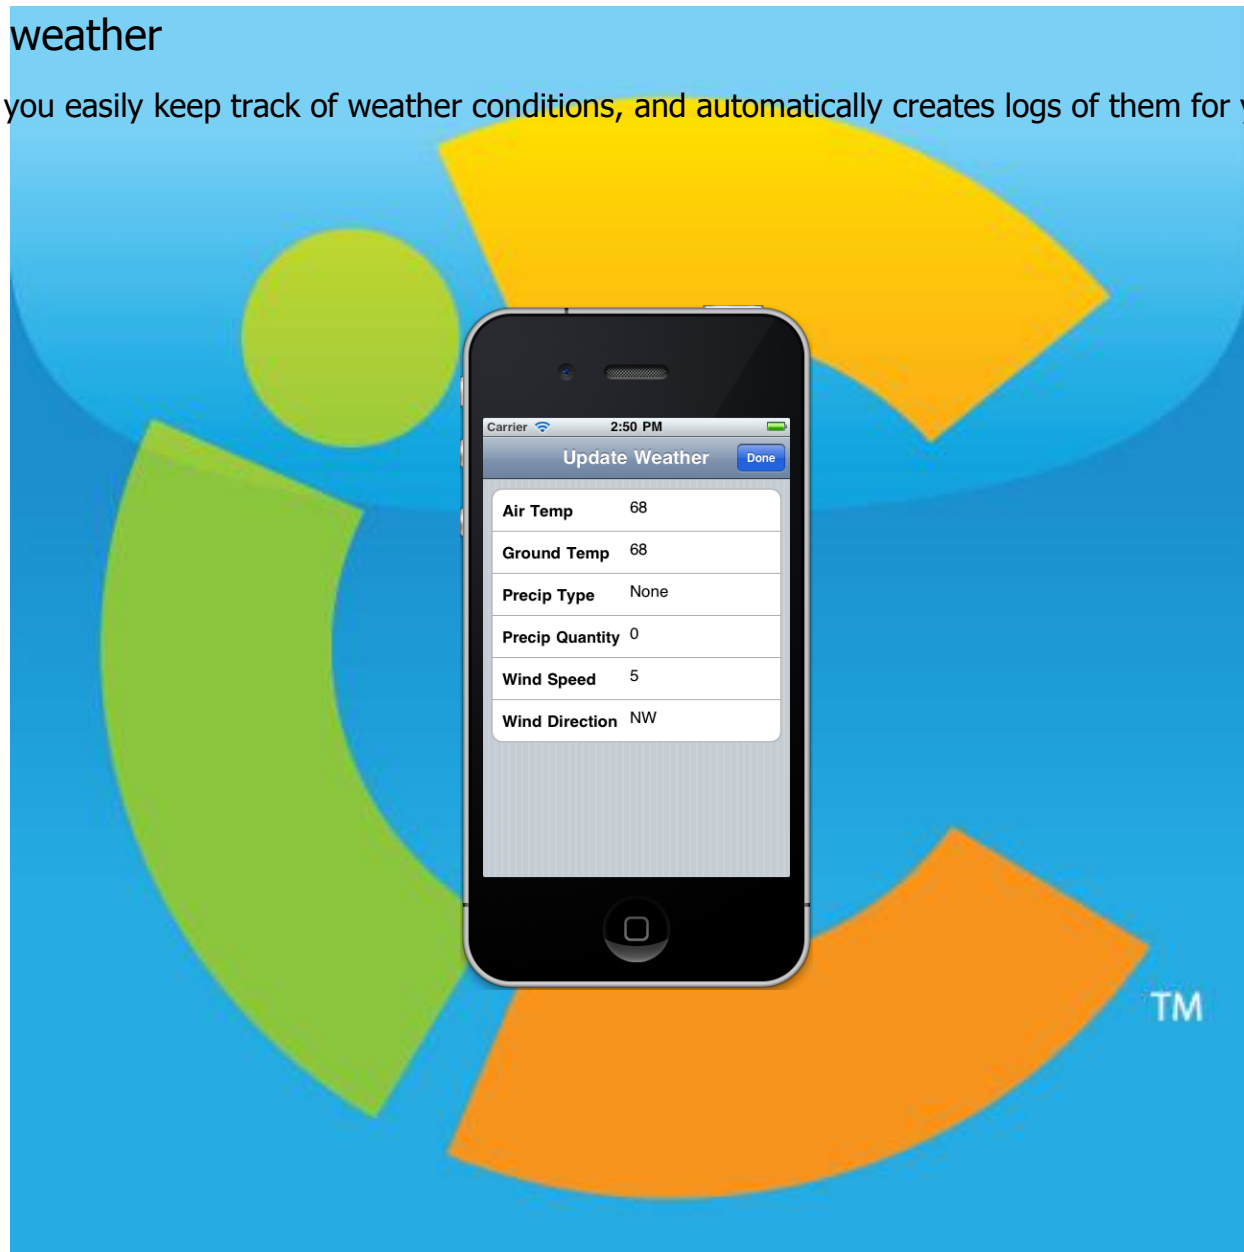

➤ Eliminate paper work orders

The Task Queue screen shows the list of tasks dispatched for the crew. It is possible to clock into multiple tasks at the same time.

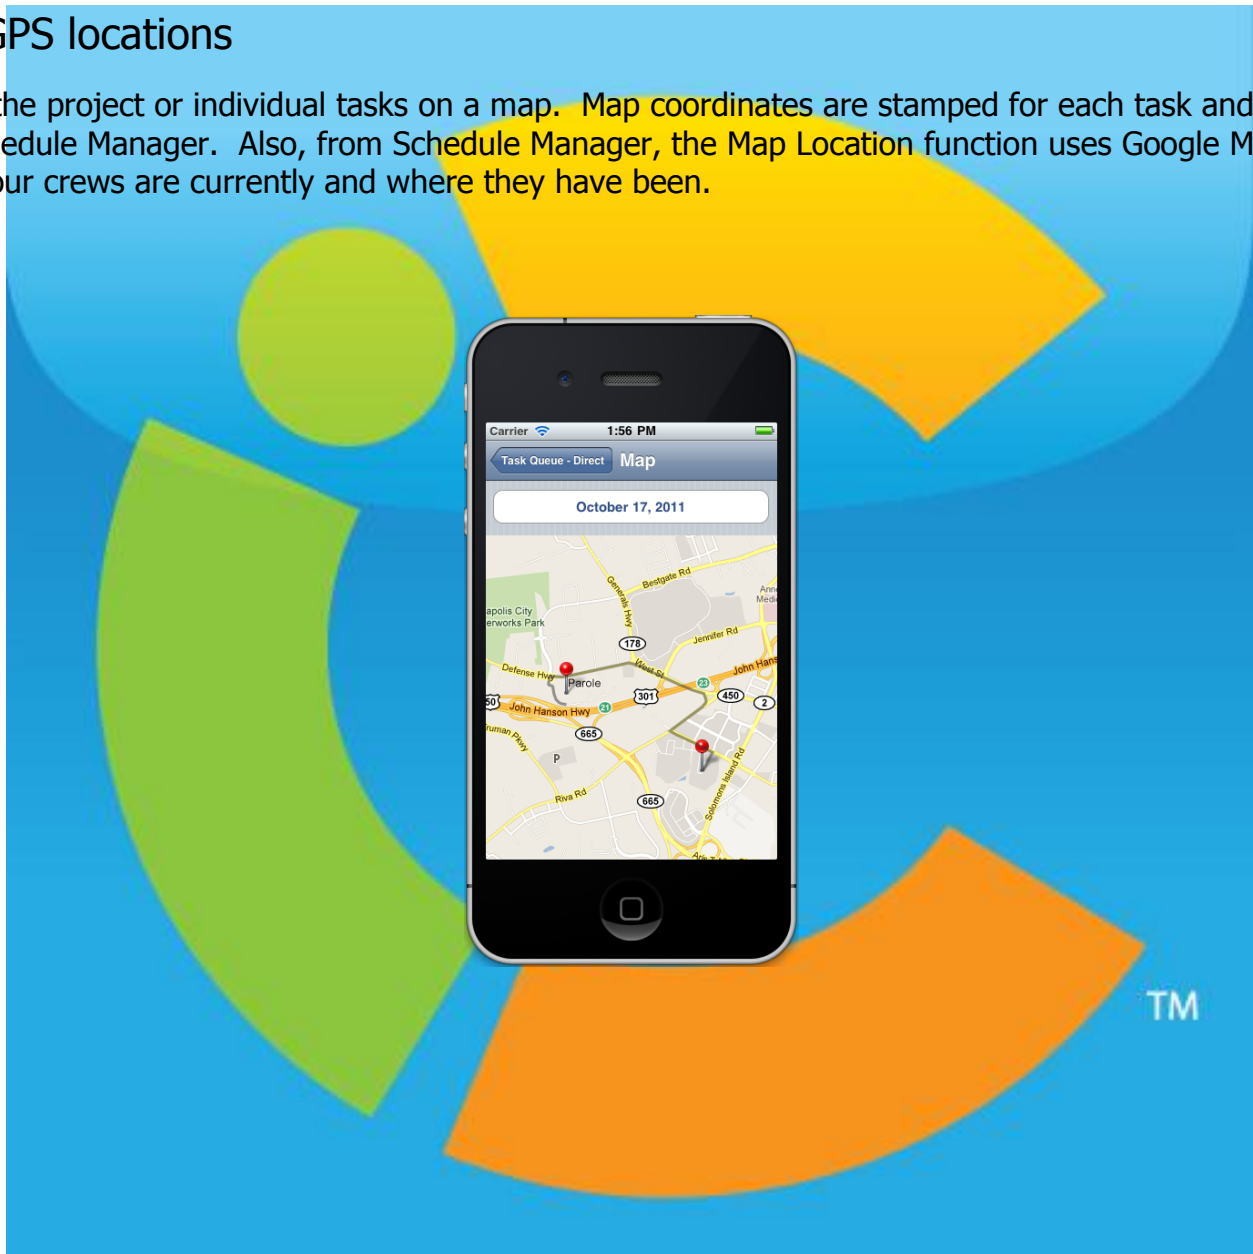

➤ Record weather

iCREWtek™ lets you easily keep track of weather conditions, and automatically creates logs of them for you.

➤ Track GPS locations

You can review the project or individual tasks on a map. Map coordinates are stamped for each task and a log is preserved in Schedule Manager. Also, from Schedule Manager, the Map Location function uses Google Maps to show you exactly where your crews are currently and where they have been.

➤ Send/receive photos and capture signature

You can take photos, add notes to a task, and get your clients to sign off on completed tasks with capture signature.

➤ Produce accurate invoices real-time

With iCREWtek™, the home office is automatically fed all the information it needs, in real time, there's no need to wait to talk to the crews, and there's no longer a risk of not billing additional materials or hours that were added on the fly.

Faster, more accurate invoices = better cash flow!
