

Encore

Product Details and Specifications

Over the years, our Maestro Plus™ has come to be lauded by coffee experts as THE go-to grinder for those who love both drip-coffee and manual brews. Building on that platform, we have developed the **Encore™**, with upgraded the burrs to give a great grind for drip/manual brew and also fine enough for espresso. The **Encore** also has a completely new gearbox.

Featuring 40 individual grind settings, from fine to coarse, the **Encore** can please any palate with its gamut of accurate and repeatable grind settings. The Encore has the accurate coarse grind for the increasingly popular manual brew methods such as pour-over, Aeropress, Siphon and Chemex. The specially designed burrs give a precise grind with minimal fines for a flavorful, balanced extraction when making espresso.

And, of course, the **Encore** is built with the quality Baratza parts you've come to trust. The efficient DC motor keeps your beans cool, even during extended grind times, while a combination of electric and gear speed reducers slow the burr to 450 RPM, ensuring a smooth bean feed and reducing noise, heat and static buildup.

Beyond a great coffee-drinking experience, the **Encore** makes for a great coffee-making experience. A convenient, front-mounted pulse button makes it easy to grind on demand into your brew basket. Whether you are looking for an espresso grinder or a grinder to help you explore that extensive range of brew methods, the **Encore** is a great all around home grinder.

Burrs: Manufactured in Europe, the **Encore's** 40 mm conical burrs will grind for many styles of coffee. Conical burr grinders are exceptional at producing consistent grinds from very fine to very coarse as well as being durable and will remain sharp for many years.

Gearbox: In 2012, Baratza introduced the second generation Gearbox (GB 2.0). With GB 2.0, Baratza has significantly increased the strength and durability of the drive transmission while decreasing noise. In addition to a new drive shaft, motor mounting plate and bushings, this change includes a new drive gear made of 15% glass filled thermo plastic which is quieter than the prior metal gear, wears better and is more shock resistant. During the **Encore's** rigorous testing process, stainless steel screws were thrown into the burrs, and in every case the motor/gear/burrs stopped immediately, the (automatically-resettable) thermal cutout was triggered, and the gears were fine.

Grind Adjustment: Turn the hopper and with 40 settings you can quickly adjust from fine for espresso to coarse for French Press. The grind range is from 250 to 1200 microns.

Grinds Left in Grinder: To maximize freshness, the **Encore** minimizes the ground coffee left in the grinder.

Brewing Methods: The **Encore** is a great grinder for manual brewing and espresso.

Motor: A powerful, high torque DC motor effortlessly drives the burrs. This motor turns slowly resulting in cool, quiet operation and permits long grinding duty-cycles. The circuitry is equipped with an automatically resetting, thermal cutoff switch.

Calibration: An innovative burr calibration system ensures that each grinder has the full range of grind. If necessary, the grinders can be user calibrated.

Speed Control: With unique speed control, the **Encore** uses a combination of gear and electronic speed reduction to control the rotation of the burr to 450 RPM. The electronic speed controller is adjustable from 405 to 495 RPM in the event that specific user conditions require modification of the speed. This slow speed reduces heat, noise, and static generation in the grinder. It also ensures that the beans feed smoothly into the burrs.

On-off Switch: The **Encore** has an easy on-off switch.

Cleaning: Burrs are easily removable with no tools, making cleaning very easy.

Accessories (which may be purchased separately):

Esatto: An accessory that transforms your **Encore** into a grind by weight grinder. Set the weight you want, the Esatto does the rest, weighing the ground coffee to within +/- 0.2g, while grinding, and stopping automatically.

Hopper extender: An extension that can add 9 oz. of capacity to the existing 8 oz. bean hopper. Several extenders can be added to get to the capacity you need.

Encore Specifications

- **Speed to Grind:** .8 to 1.1 g/sec.
- **Bean Hopper Capacity:** 8 oz. (227 g)
- **Grounds Bin Capacity:** 5 oz. (142 g)
- **Weight:** 7 lbs. (3.1kg)
- **Dimensions:** WxHxD cm 12x35x16 cm
- **Power Rating (North America):** 110 V AC 50/60 Hz. 1 Amp
- **Power Rating (Other):** 230 V AC 50/60 Hz. .5 Amps
- **Safety Listing:** UL/CSA/CE/EK
- **Particle Distribution:** Not available at this time
