

IXPER® 75C Calcium Peroxide is used for enhanced aerobic bioremediation. This is a process in which organic contaminants found in soil and/or groundwater are degraded by indigenous or inoculated microorganisms transforming them to innocuous end products. This product can be used to degrade a variety of contaminants including petrochemical spills and other aerobic biodegradable compounds.

DESCRIPTION

IXPER 75C Calcium Peroxide is a fine, very pale yellow, odorless powder that contains primarily calcium peroxide.

APPLICATIONS

IXPER 75C Calcium Peroxide is used for enhanced aerobic bioremediation for treatment of: BTEX (benzene, toluene, ethylbenzene and xylenes), MTBE (methyl tertiary butyl ether), TPH (total petroleum hydrocarbons) from light and heavy fuel oils, non-halogenated volatile solvents, such as methylethylketone, methanol, ethanol, acetone, ethyl acetate, acetonitrile, tert-butyl alcohol, phenols, PAHs (polycyclic aromatic hydrocarbons), some halogenated compounds, such as vinyl chloride, chlorobenzenes, high explosives.

HANDLING, STORAGE, AND INCOMPATIBILITY

Store containers in a dry location away from heat and out of direct sunlight in original containers and at temperatures less than 40°C (104°F). Store in an area away from acids, bases, metals, metal salts, reducing agents, organic materials or flammable substances. Never return unused product to the storage container.

Equipment used for handling this material should be made of plastic, stoneware, glass or stainless steel. Enamelled or resin-coated equipment is also suitable. Copper and copper alloys should be avoided. Holding equipment must be adequately vented to prevent any pressure buildup in the event of product decomposition.

Fires may be controlled and extinguished by using large quantities of water. Refer to MSDS or eSDS for more information. For first aid measures, refer to the MSDS or eSDS for more information.
