WHY MIGRATE?

Time is running out to migrate to Windows 7 or 8. Windows 7/8 offers improved reliability and reduces operating costs. If you continue to use XP, what does this mean to you?

- You will no longer receive security patches, hotfixes, or incident support. Your computer will be open to newly-discovered threats with no way to protect you.
- Running on an older OS platform is less secure, more difficult to manage, and expensive to maintain. Microsoft estimates that it will cost an organization \$60K - \$100K per year for a customized support agreement. Can your organization afford that?
- Running on an older OS platform also exposes your customer to business and regulatory risks.
- User Account Control (UAC) is better than ever with Windows 7/8 – and more configurable.
- New programs and applications (such as IE9) can only run on Windows 7/8 and are not compatible with XP.

NOW IS THE TIME TO MIGRATE TO WINDOWS 7 OR 8!

On April 8, 2014, Windows XP SP3 will reach end of support lifecycle and will no longer be supported. To migrate at your own pace, you need to start planning now for a smooth Windows migration. Whether you choose Windows 7 or Windows 8, **IntraSystems can help you every step of the way.** Having a solid migration plan for all desktops, both physical and virtual, is vital. Managing the transition without user disruption or productivity loss is an utmost requirement. Any hiccups within the migration process can become all-too visible throughout a company.

WINDOWS 7 OR 8?

Which one is right for you? Windows 8 adds optimized touch screen support to the proven Windows 7 code base — which means that you get the same tried and true Windows 7 benefits.

If you don't need touch screen support, Windows 7 may be your best bet. Windows 7 has been tuned to handle every kind of real-world performance challenge during the last three years — which means your employees won't have to.

You will realize cost savings and security benefits with either upgrade, Windows 7 or Windows 8. According to an IDC white paper, you can reduce the cost to support each of your PCs **five times** over throughout the solution lifecycle by migrating to the next-generation Windows operating system.

MIGRATION PLANNING

Without accurate, up-to-date answers for the entire user population to be migrated, it is extremely difficult to plan a migration. User environments typically evolve over time. As a result, many companies lack the immediate depth of insight into their user environment that is required for a successful OS migration.

- Do you know which employees are using what applications?
- Which applications have customized vs. standard interfaces?
- Where every user typically prints?
- Whose hardware can run Windows 7 or 8 as is, and which require hardware upgrades or replacements?
- Which applications are supported in Windows 7/8?
- And if VDI is part of the Windows migration, which applications are not compatible with VDI?

QUESTIONS AND PROVIDE A
SEAMLESS MIGRATION FOR
YOUR ORGANIZATION!**

ABOUT INTRASYSTEMS

IntraSystems was founded on the premise that a company should focus on their core competencies - not systems and networking infrastructure issues. By assisting in the design, installation, security, and maintenance of networked technologies, IntraSystems enables corporations to focus on business growth and utilize new technologies to enhance corporate productivity. We follow through on all aspects of IT planning, development and maintenance for server-based computing, security and network integration, network diagnostics, virtual private networks, disaster recovery and outsourced technical support.

Our mission is to provide secure application delivery, virtualization services and secure network infrastructure solutions centered on the principles of excellence, service, and quality. IntraSystems delivers customer satisfaction through technical competence, prominent partnerships, and professional integrity of all employees. Because our specialized core knowledge and experience is difficult to duplicate, we can offer customers a trusted relationship with the highest level of personalized service in the industry. Whether a company needs customized IT solutions, managed service or training, the IntraSystems team combines in-house expertise and the highest level of business partnerships to allow customers to get on with their core business.

We know that the foundation of your network depends on your infrastructure's organization. Whether you count on one IT department or you're structured with different departments that manage each element of your network, IntraSystems can help prioritize what's most important to your success. IntraSystems draws on key knowledge and extensive experience in assessing, designing and deploying solutions specific to your organization. Moreover, we review your business priorities and your environment - seeking the right combination of technical skills and technology to suit your unique situation. The IntraSystems team understands the advantages of being flexible and proactive. There's no single recommendation or favorite product that is a solution. We craft solutions that fit your needs alone, while keeping you informed of the latest developments affecting your business.

Recommending, customizing, and implementing IT configurations form the backbone of our key strengths. Over the years, these services and our long-standing reputation of technological and business integrity have merited an impressive list of satisfied customers. Naturally, we take our responsibility very seriously. It's an approach that works well in everyday situations — and it's precisely what drives our success.

DID YOU KNOW?

INTRASYSTEMS CAN HELP YOU OPTIMIZE YOUR INFRASTRUCTURE, REDUCE COSTS, IMPROVE APPLICATION AVAILABILITY, AND ENHANCE SERVICE DELIVERY.

FROM ASSESSING AND DESIGNING A SOLUTION TO DEPLOYING AND IMPLEMENTING THE PROJECT TO TRAINING AND DOCUMENTATION SERVICES, YOU CAN RELY ON INTRASYSTEMS TO MANAGE AND SUPPORT ALL OF YOUR MICROSOFT INFRASTRUCTURE NEEDS.
