TAGA healing is a shamanic, magical, transformational modality by revealing **What Is** and optimizing **What Will Be**. Emotional and energetic knots are "detangled" and healing rituals and blessings are performed.

Guided by the ancestors, guides and angels, TAGA Healing is profound! Breakthrough results are often reported, even for those who simply join and hold the space for those in the circle.

**Please contact: Rev Donna Zehner 408-309-4087 [revrealtordonnaz@aol.com](mailto:revrealtordonnaz@aol.com) for next group healing and appointments.**

TAGA Healings will be conducted by the order in which they are reserved. A wait list will be created if there is an overflow.

### **The Process**

A group gathers in a circle. The first participant will begin the process by stating their heart's desire. Though most are not aware of it, they are aligning their conscious vibration with each component therein. Those in the circle will be randomly selected by the participant to hold aspects (packets of consciousness) contained within the heart's desire and they will be placed in proximity to one another by what feels right to the participant.

With little to no effort, those "holding" the packets of consciousness will feel the vibration that resonates within each packet generated by the essence of each assigned meaning such as: an obstacle, a family member, abundance, an emotion and so forth. Revealing happens within the individual and/or family cluster, when the packets of consciousness express what they feel/sense/know. Optimization for a balanced, harmonized healing pathway is then created from the interactions of the new knowledge received.
